**PLEXIGLAS® – for
unusual lighting effects
in the car.**

What does PLEXIGLAS® have to do with car design? For over 60 years, PLEXIGLAS® molding compounds have been a driving force behind the auto industry. Why? Because the multi-faceted ways in which PLEXIGLAS® can be formed open up virtually endless possibilities for design. One shining example is highly transparent PLEXIGLAS® whose top light-guiding properties and UV stability make for innovative automotive lighting systems. For more inspirational PLEXIGLAS® products, go to www.plexiglas-polymers.com.
