

# LAMBORGHINI KOOPERATION

## LAMBORGHINI KOOPERATION

Designed during the summer semester (SS 2026) in the course Interior Design, in cooperation with Centro Stile Lamborghini.

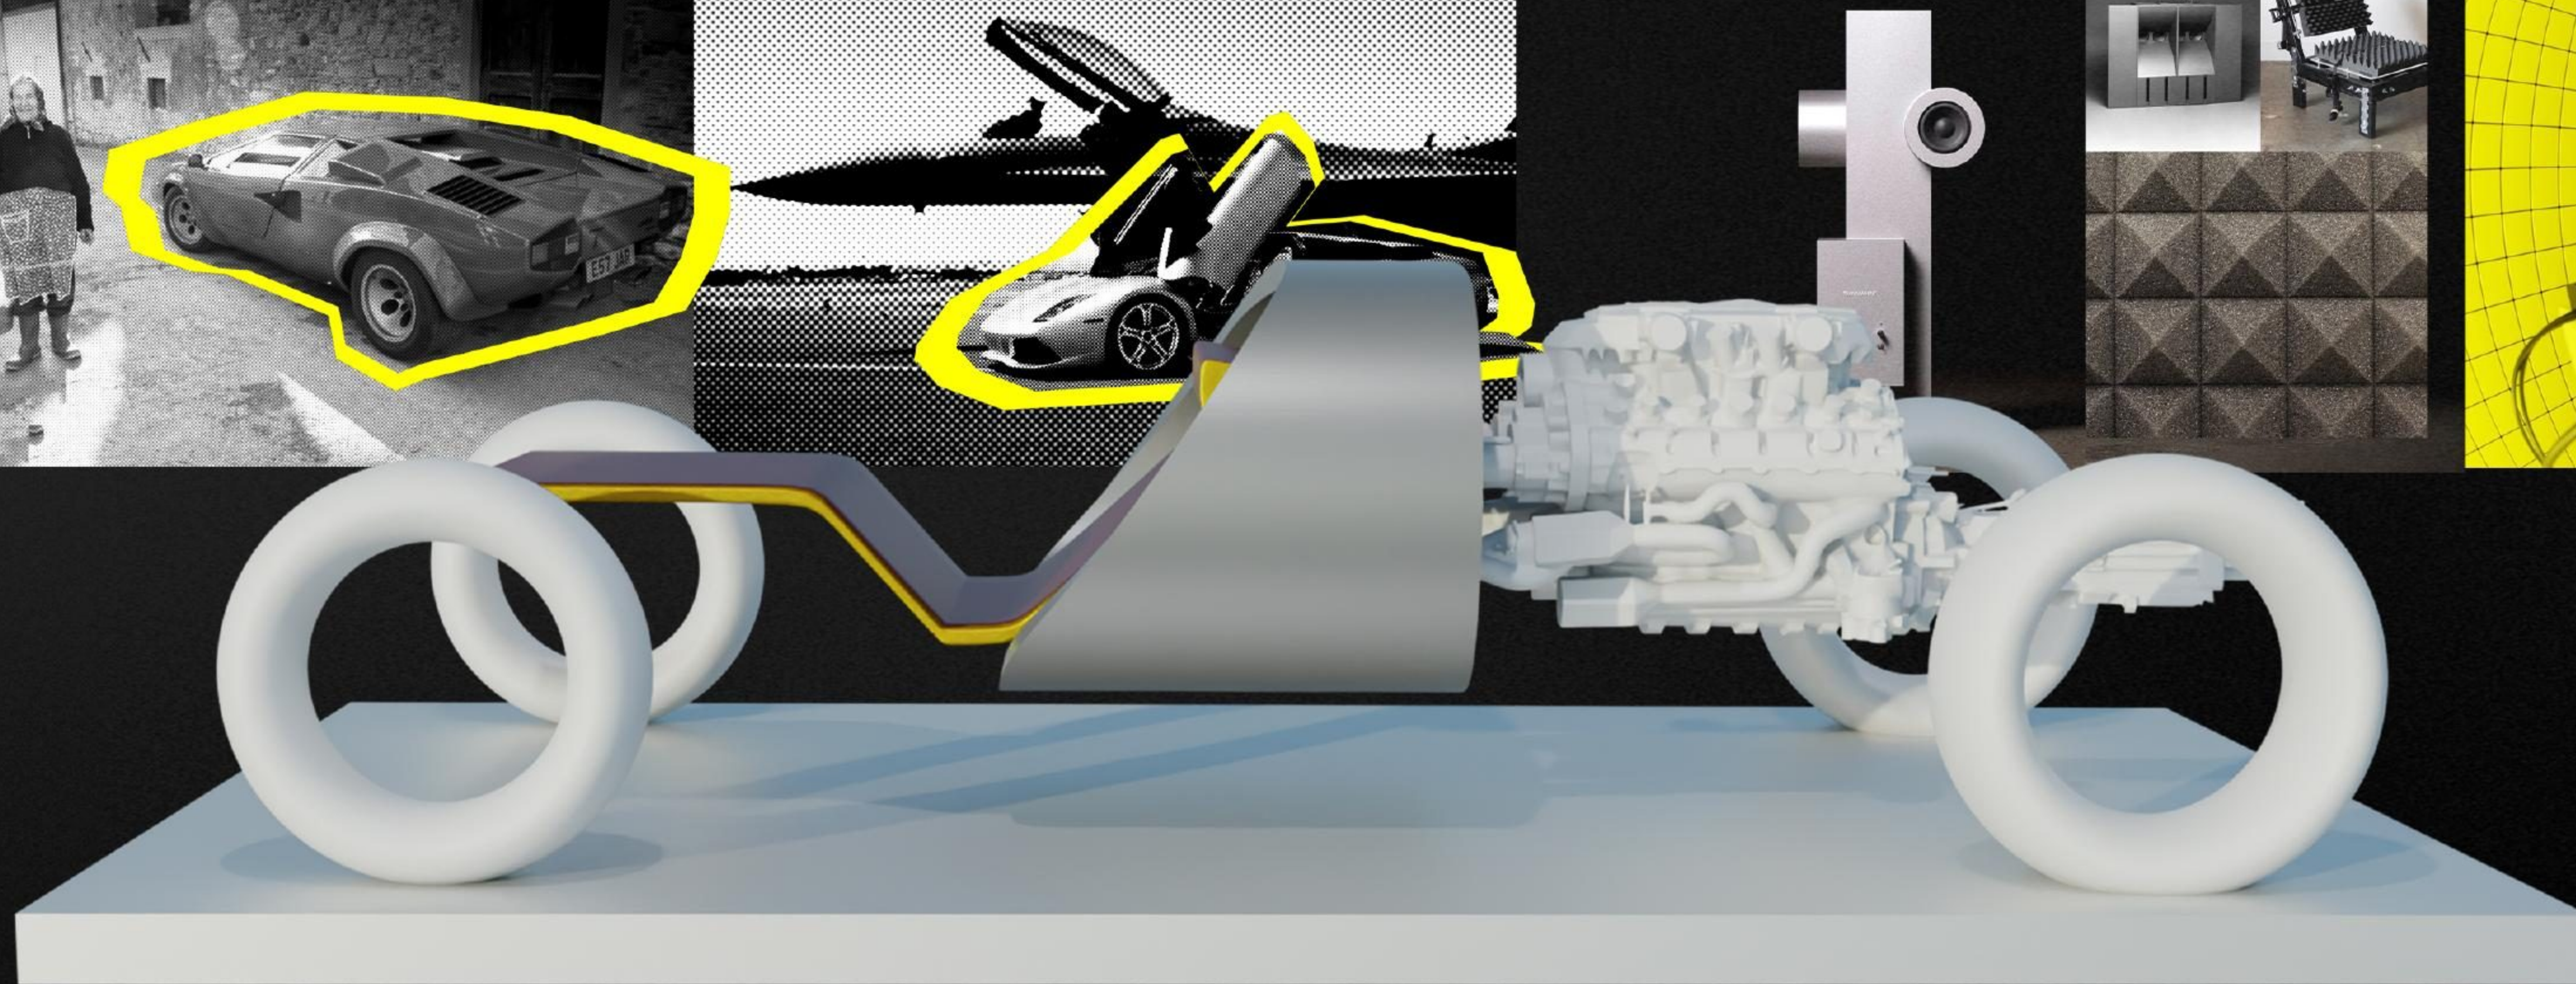

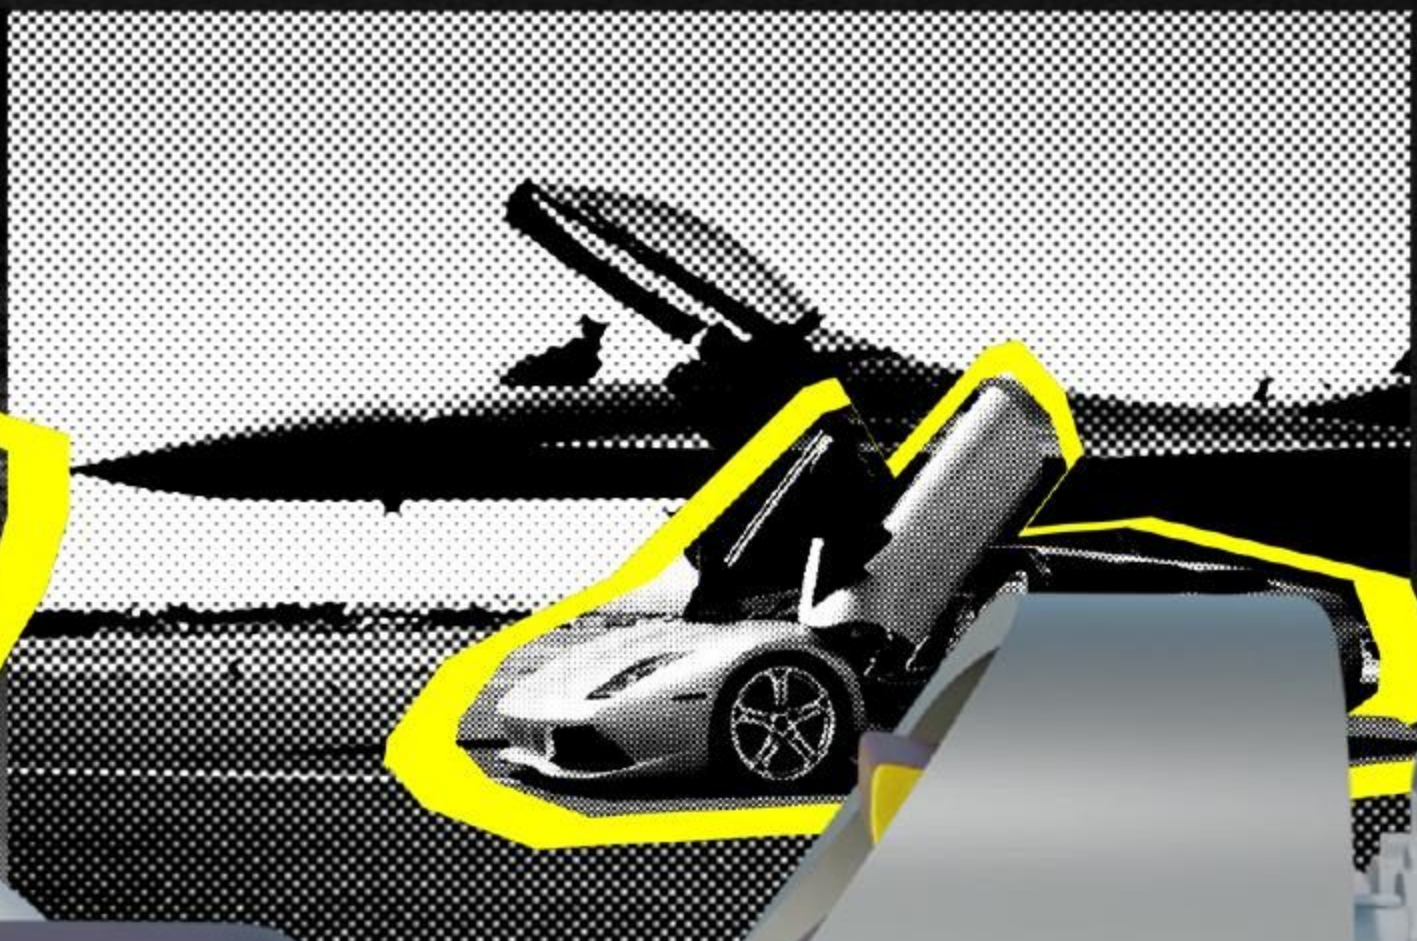

(Der Name kommt noch) is a hypercar interior concept based on the Lamborghini Manifesto - positioned between a grand tourer and an aerodynamic race car, powered by a twin-turbocharged W12.

The concept is built around one radical dichotomy: a single-seat joystick-controlled cockpit in Jet Mode, and a two-seat autonomous lounge in Level 4 Autopilot Mode. The seating system consists of a pneumatically actuated hexagonal foam pyramid pattern that physically reconfigures between both states.

The design language follows Techno - because if Lamborghini was a genre of music, it would be Techno.

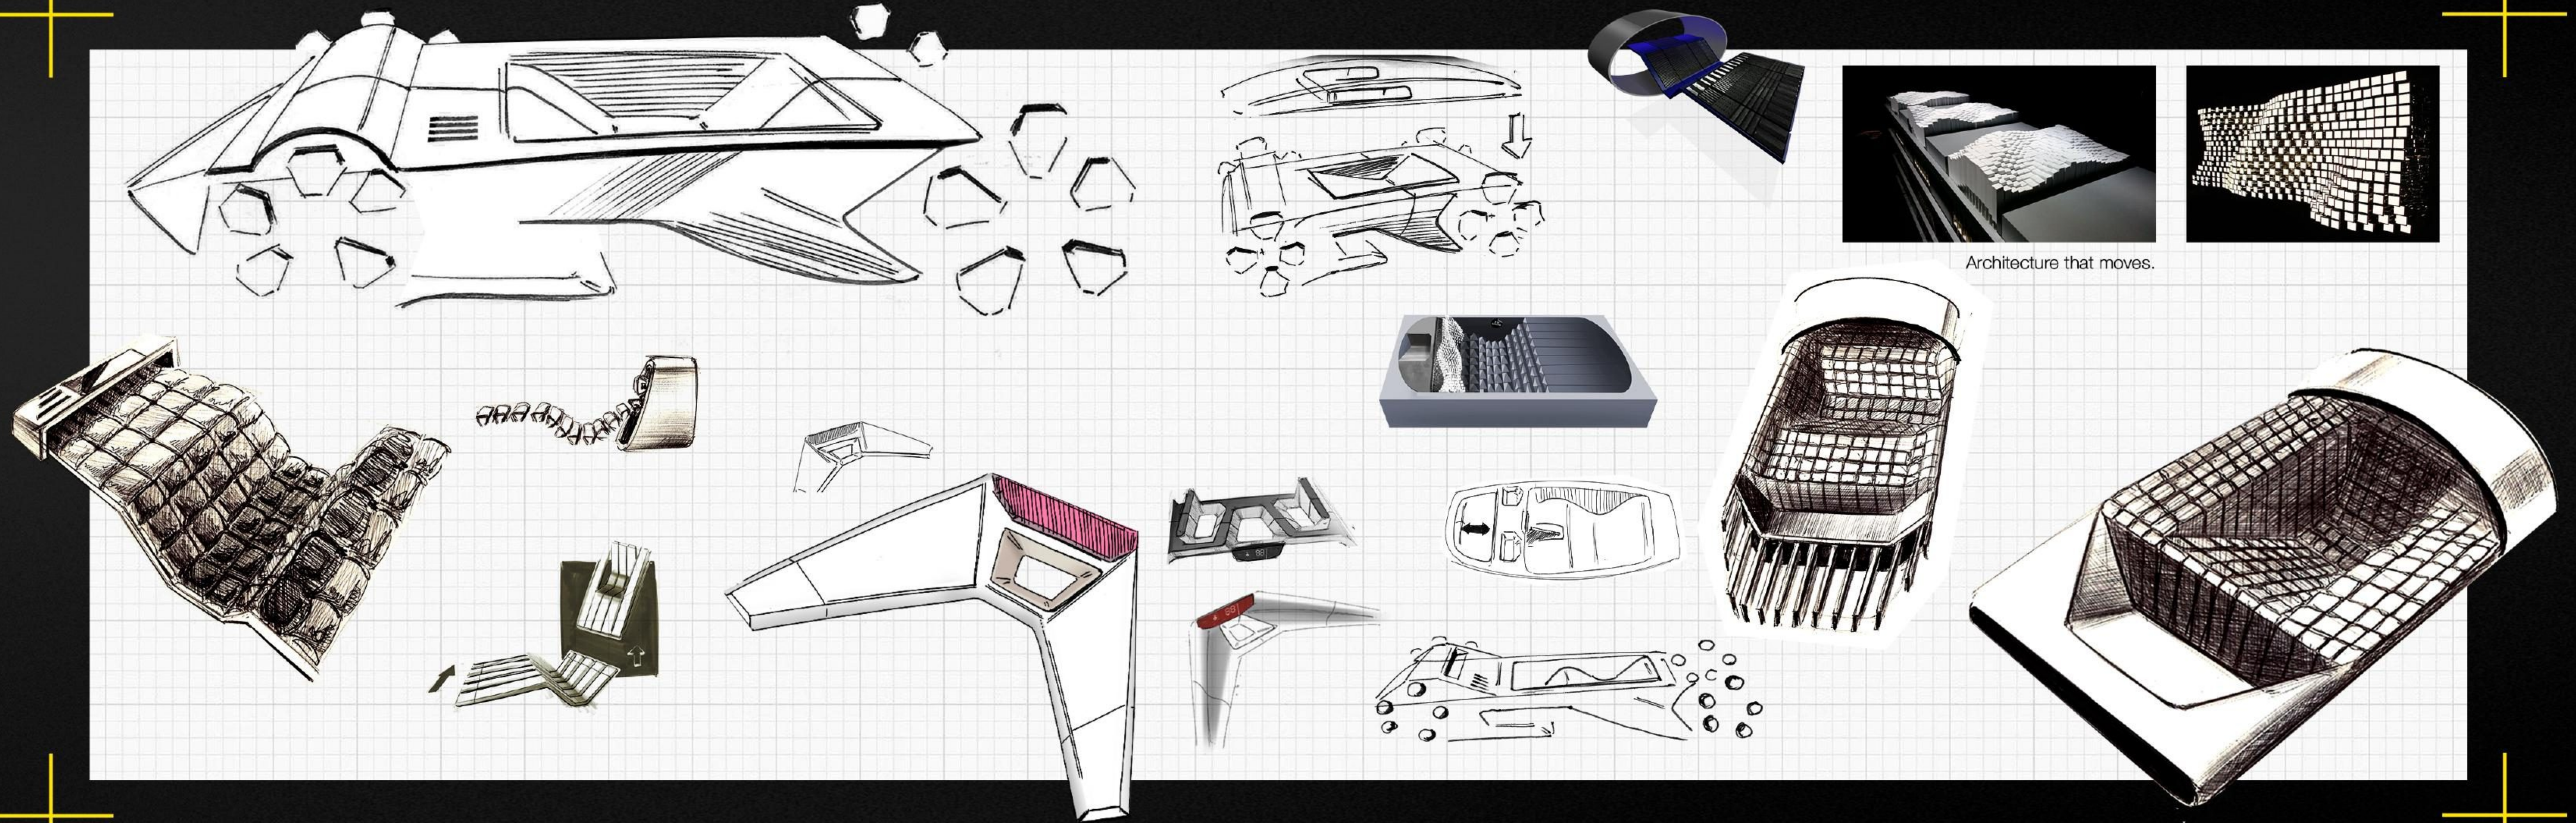

# LAMBORGHINI X TECHNO
