Prof. Alexander Forst

In the future, wealth will not be measured in money - but in the quality of time we own

Quality Time:

Quality time is not defined by speed or efficiency, but by calm, presence, and meaningful moments.

While money can buy comfort, it cannot buy peace of mind, shared moments, or time truly felt, with the people we love.

problems

For many of us, everyday life feels heavy, loud, and exhausting. Time is lost in traffic, noise, stress, and constant frustration.

problem

DISTANCE **45** km
DURATION **120** min

DISTANCE **5** km
DURATION **15** min

persona

Ethan Miller

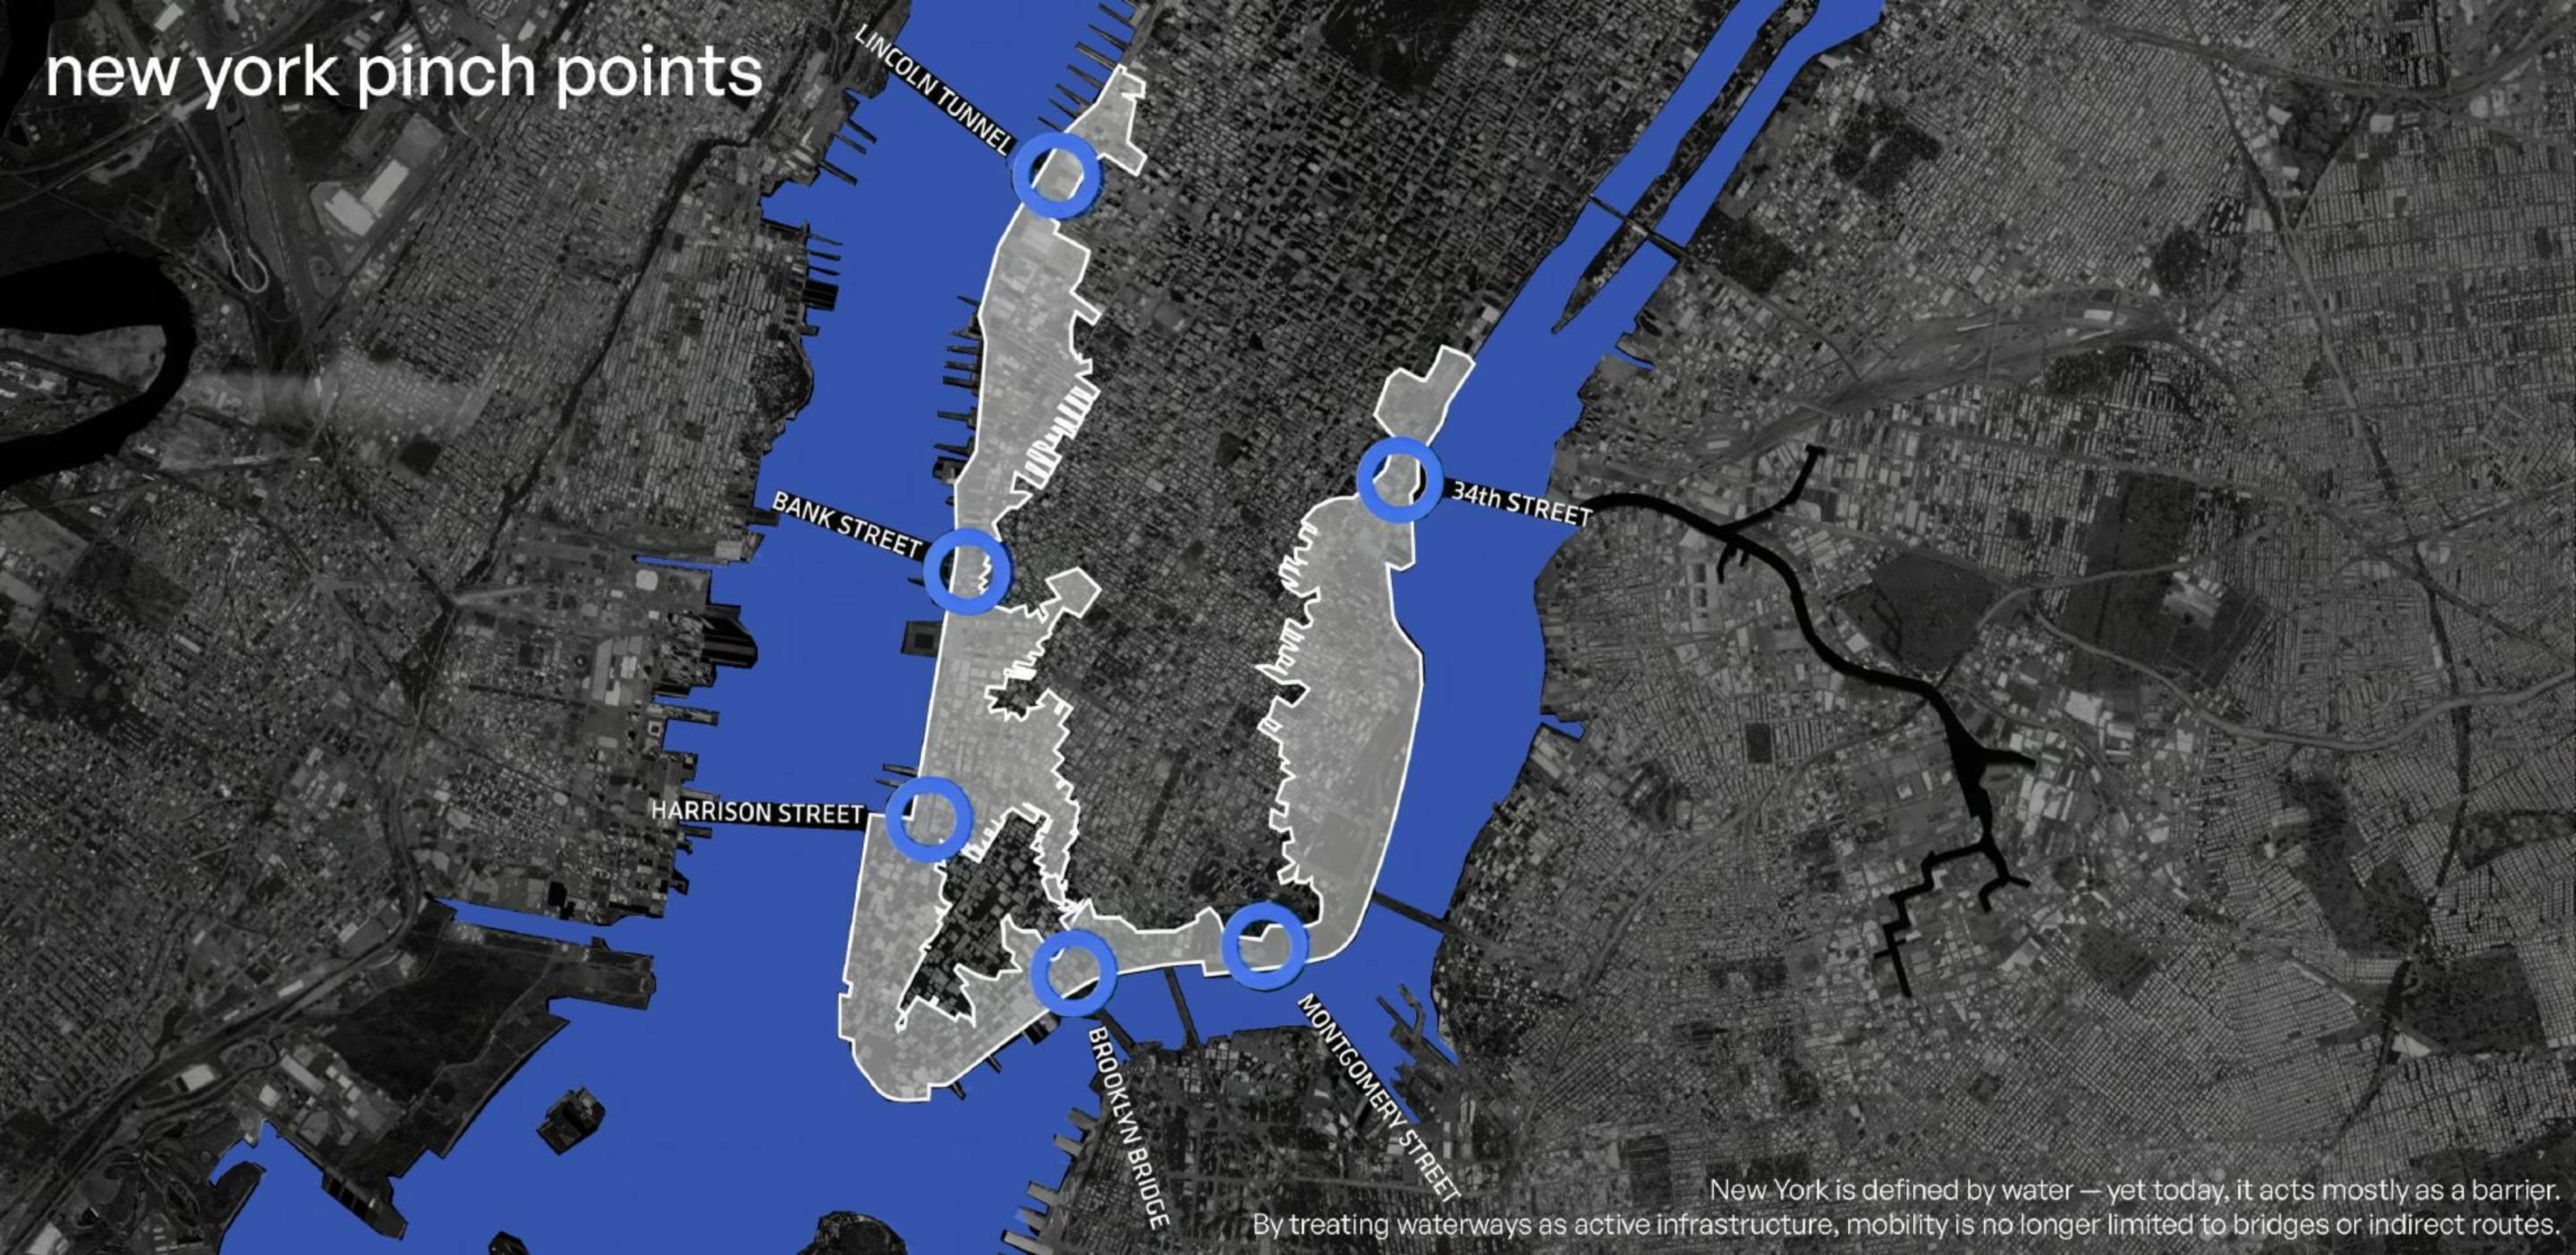

29 years old
IT Consultant
lives in New York City

Daily commute ranges from 45 minutes to over 2 hours
Travel routes change daily due to meetings at multiple locations

how?

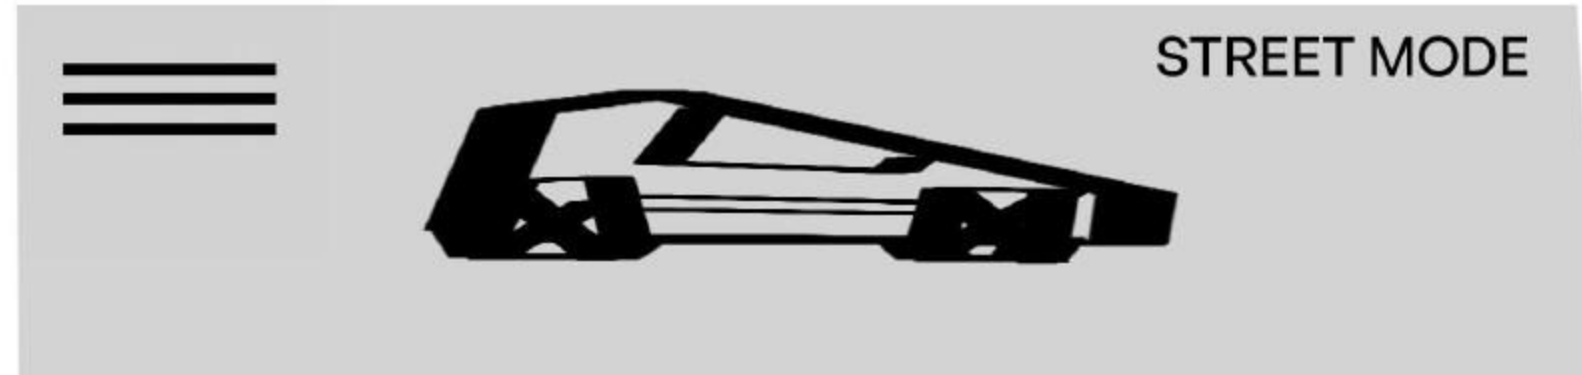

new york pinch points

New York is defined by water — yet today, it acts mostly as a barrier.

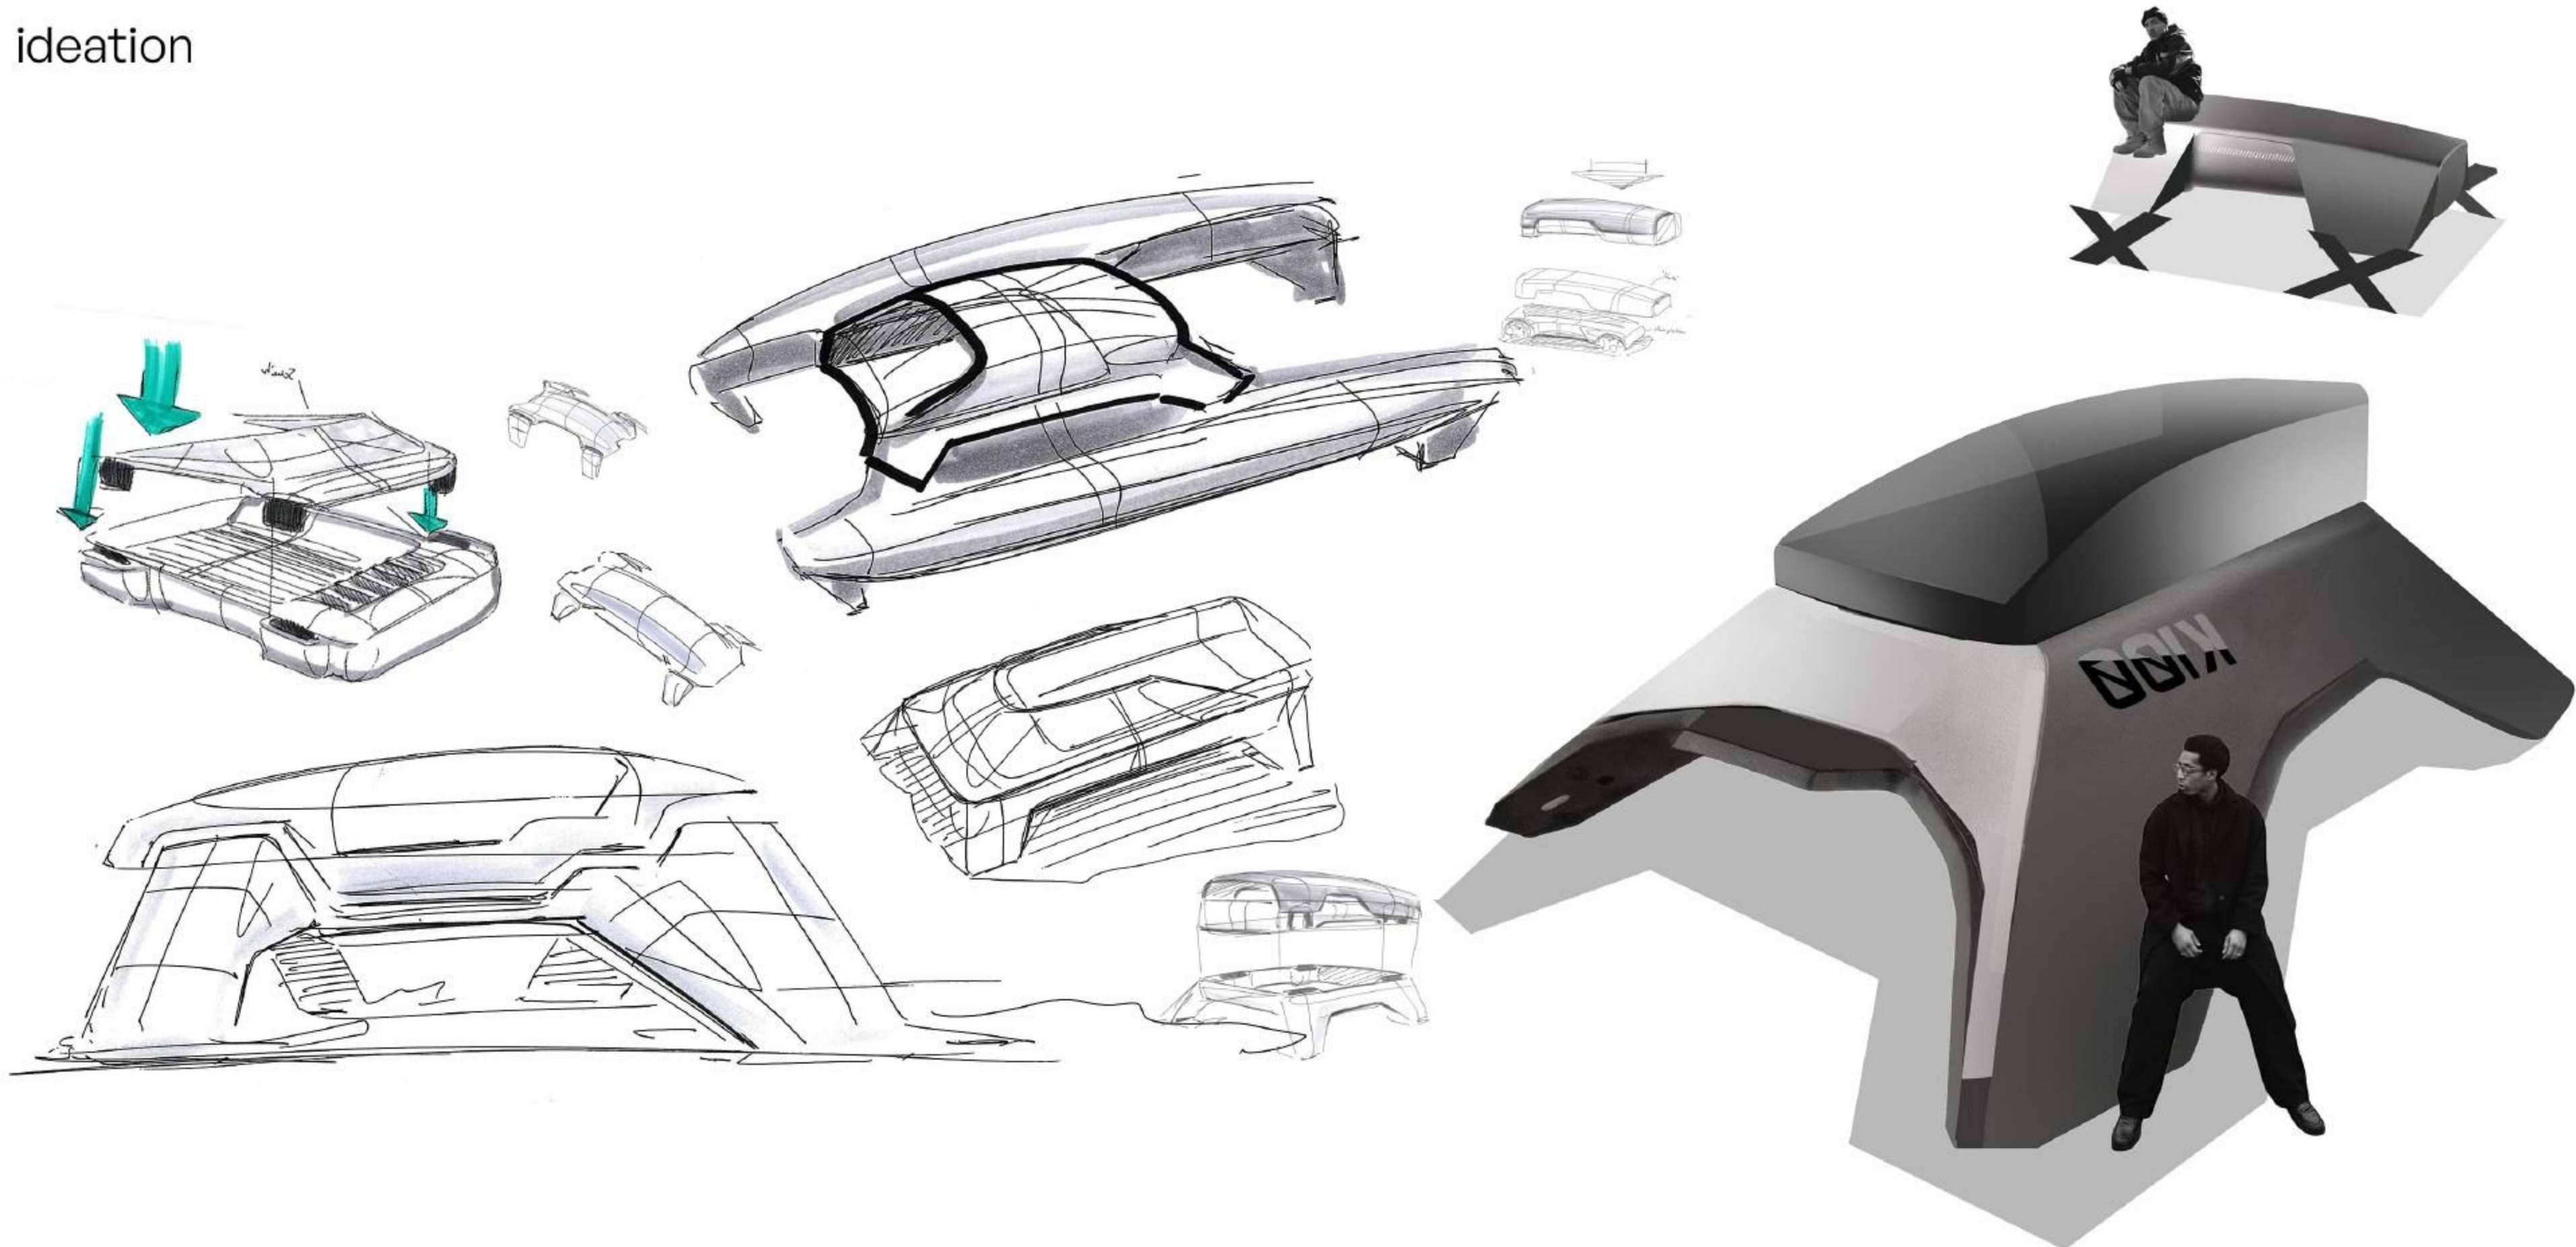

By treating waterways as active infrastructure, mobility is no longer limited to bridges or indirect routes.

CONCEPT

The fastest route isn't always a road.

ideation

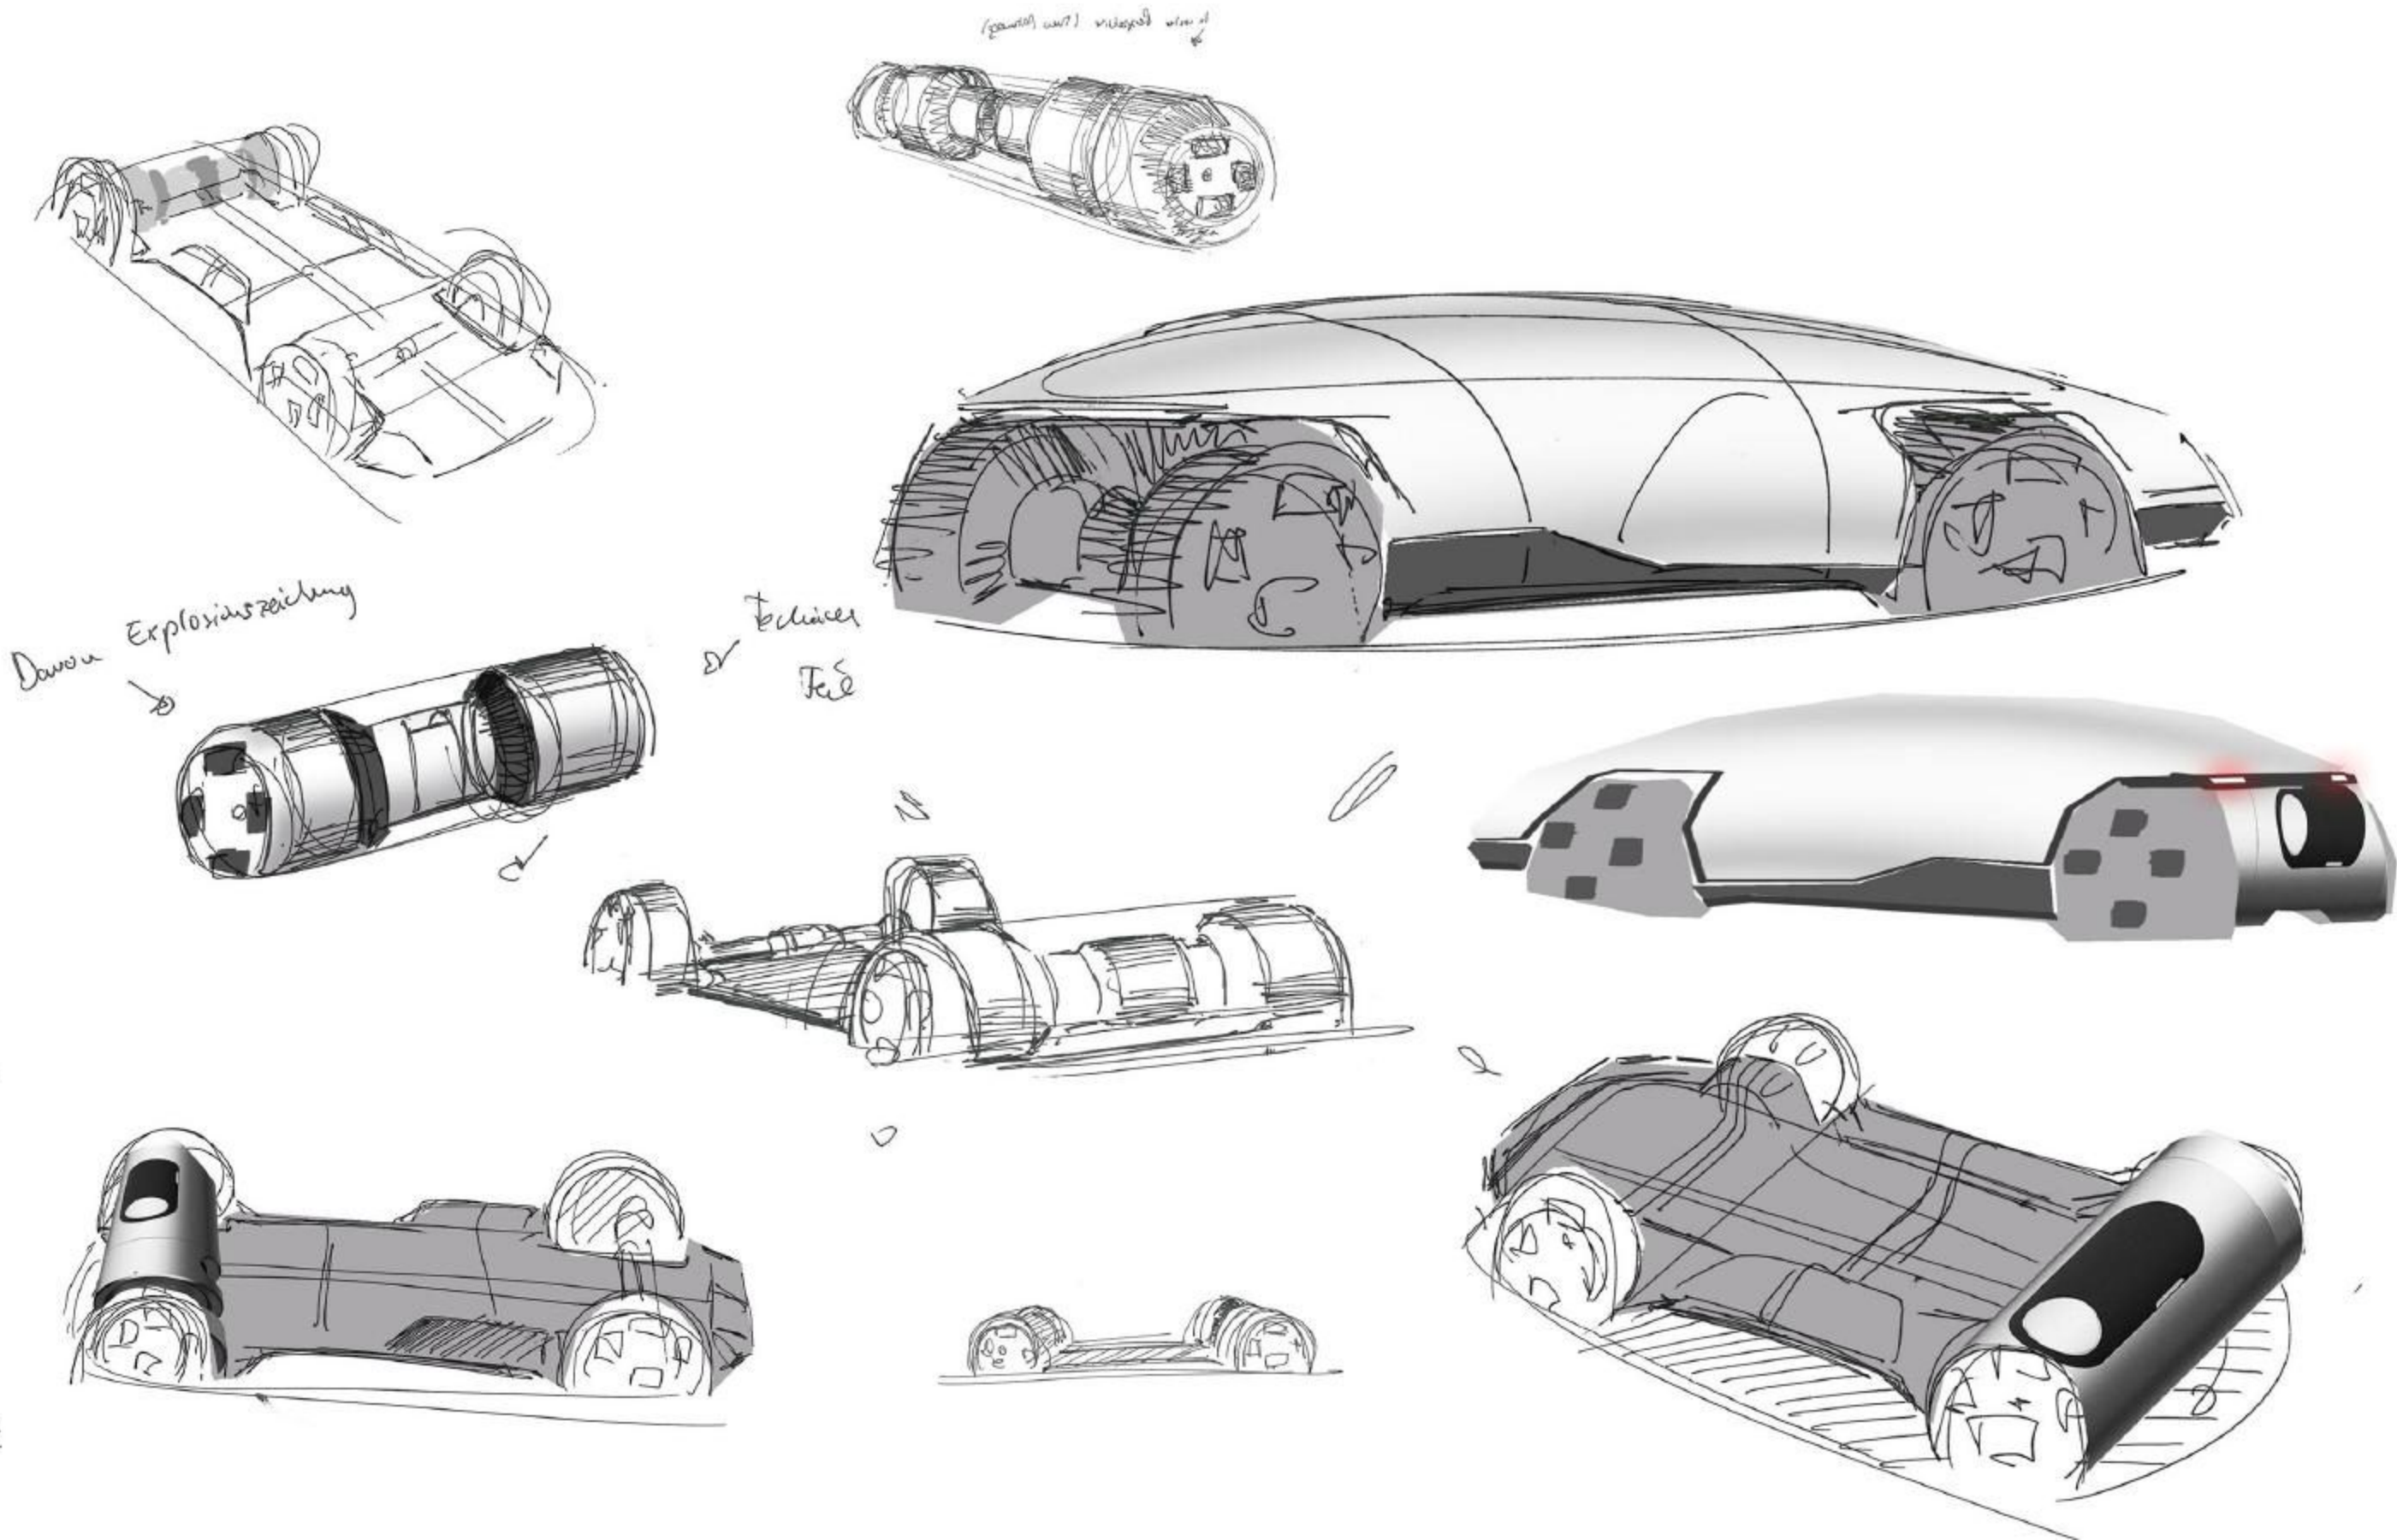

exploring directions

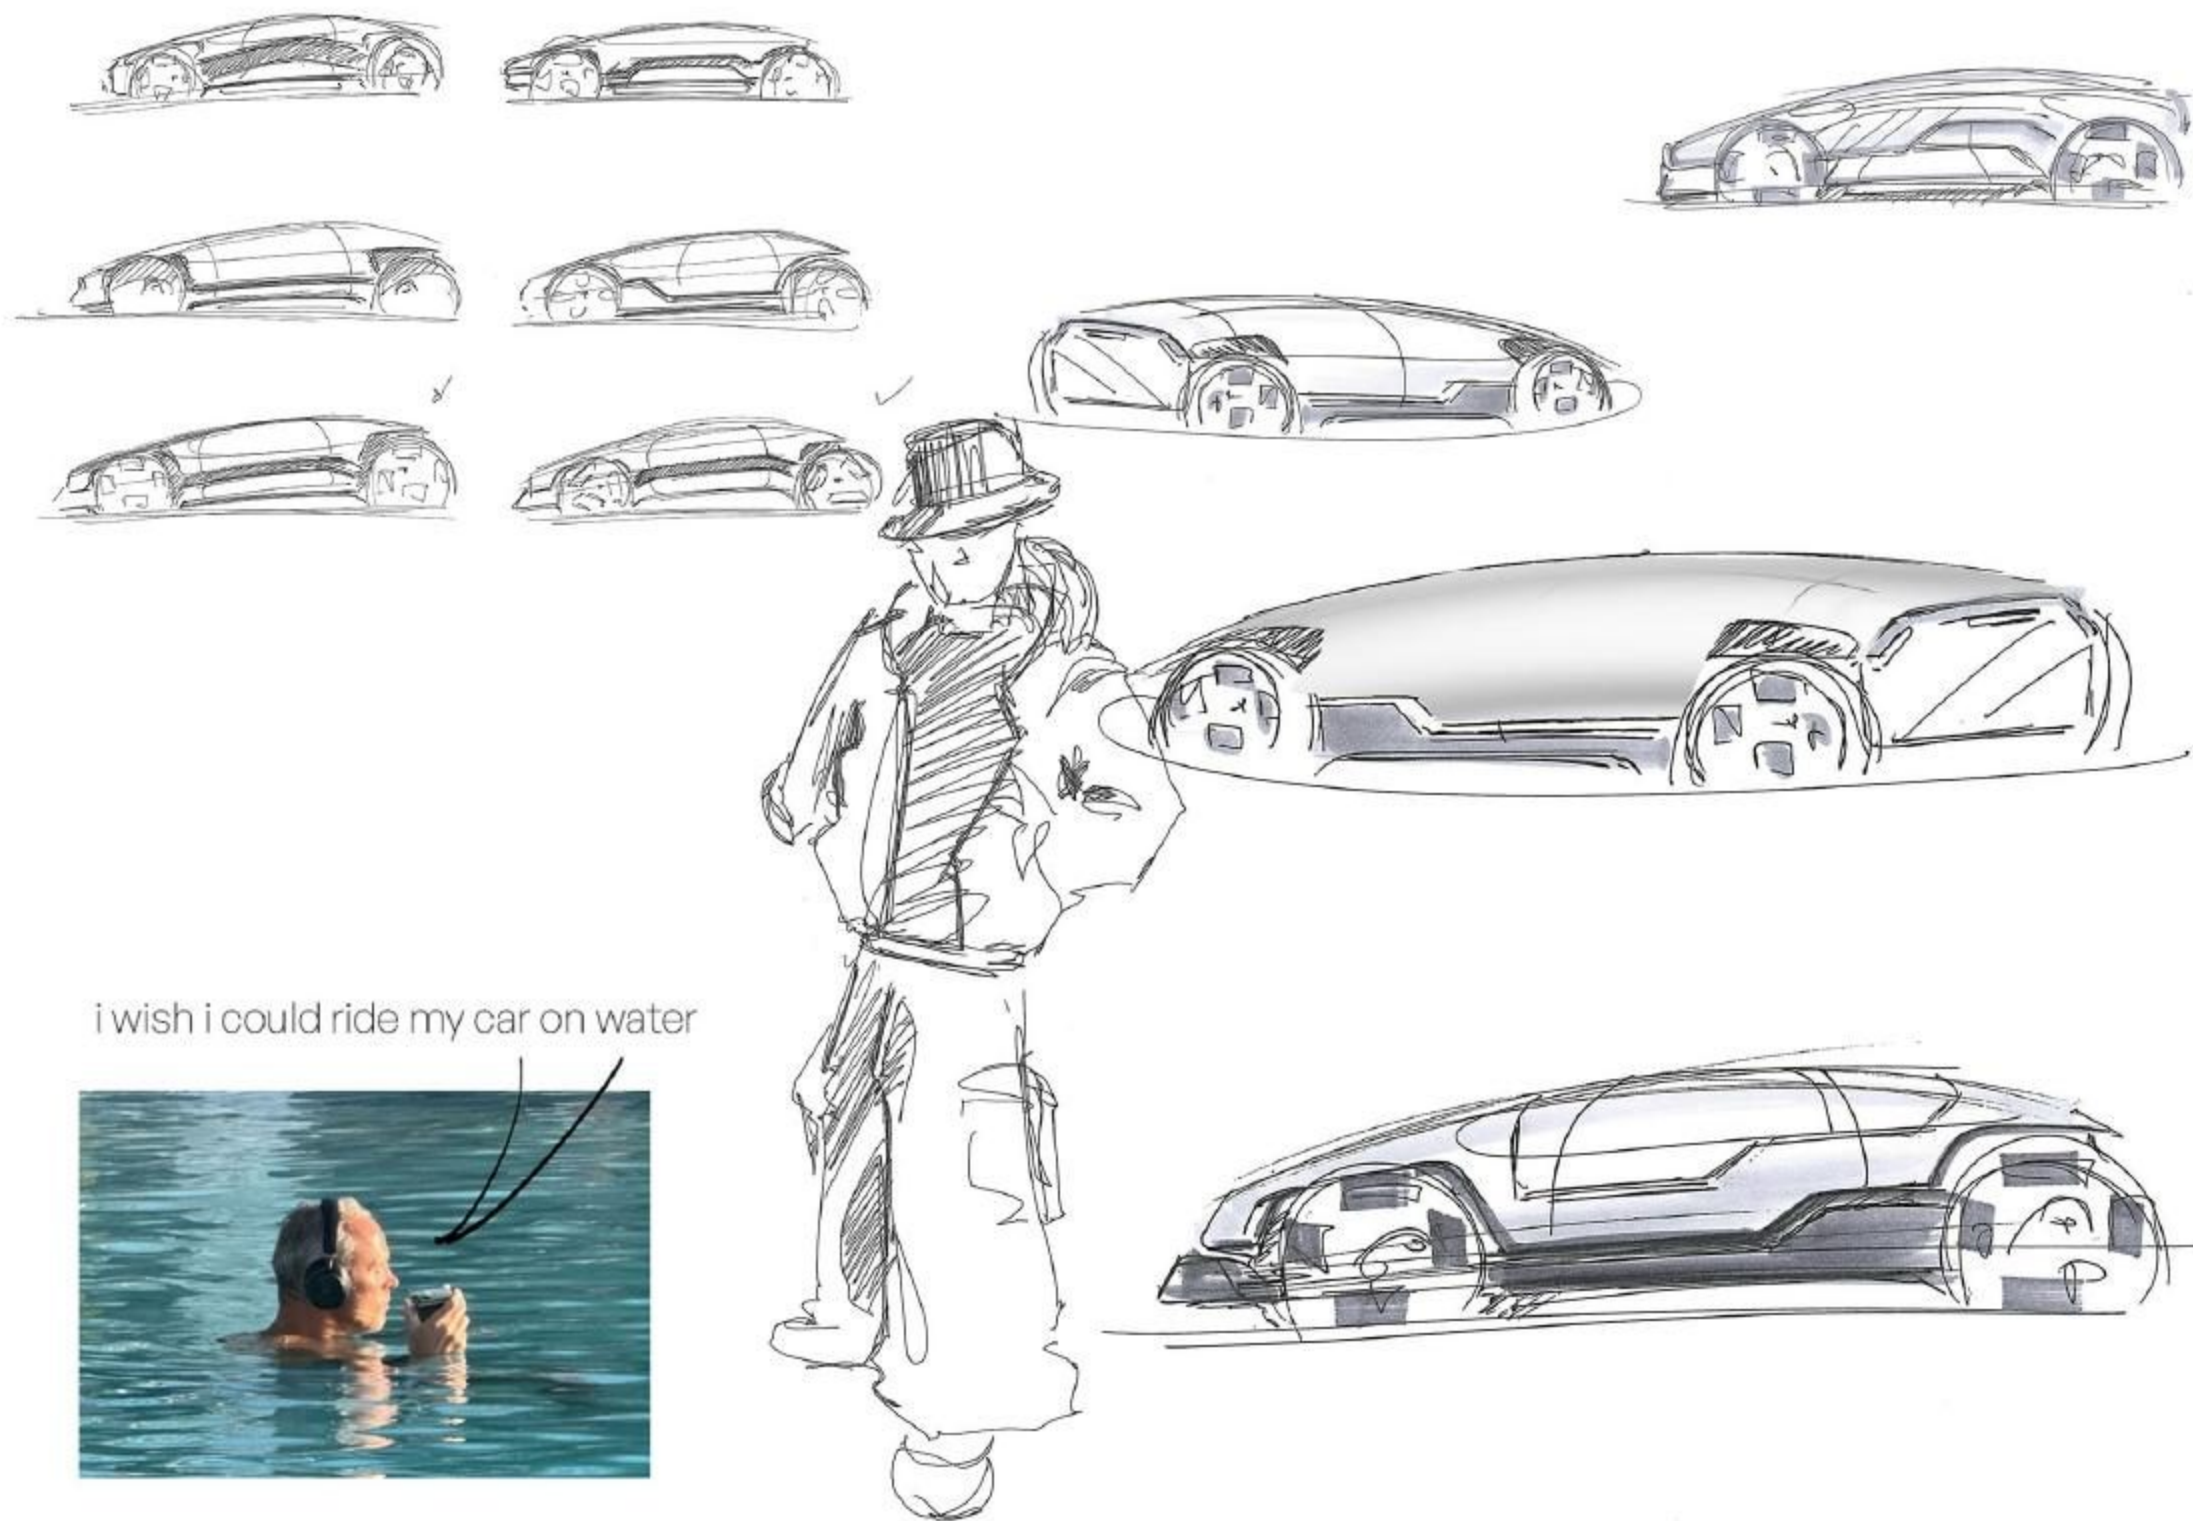

monolith

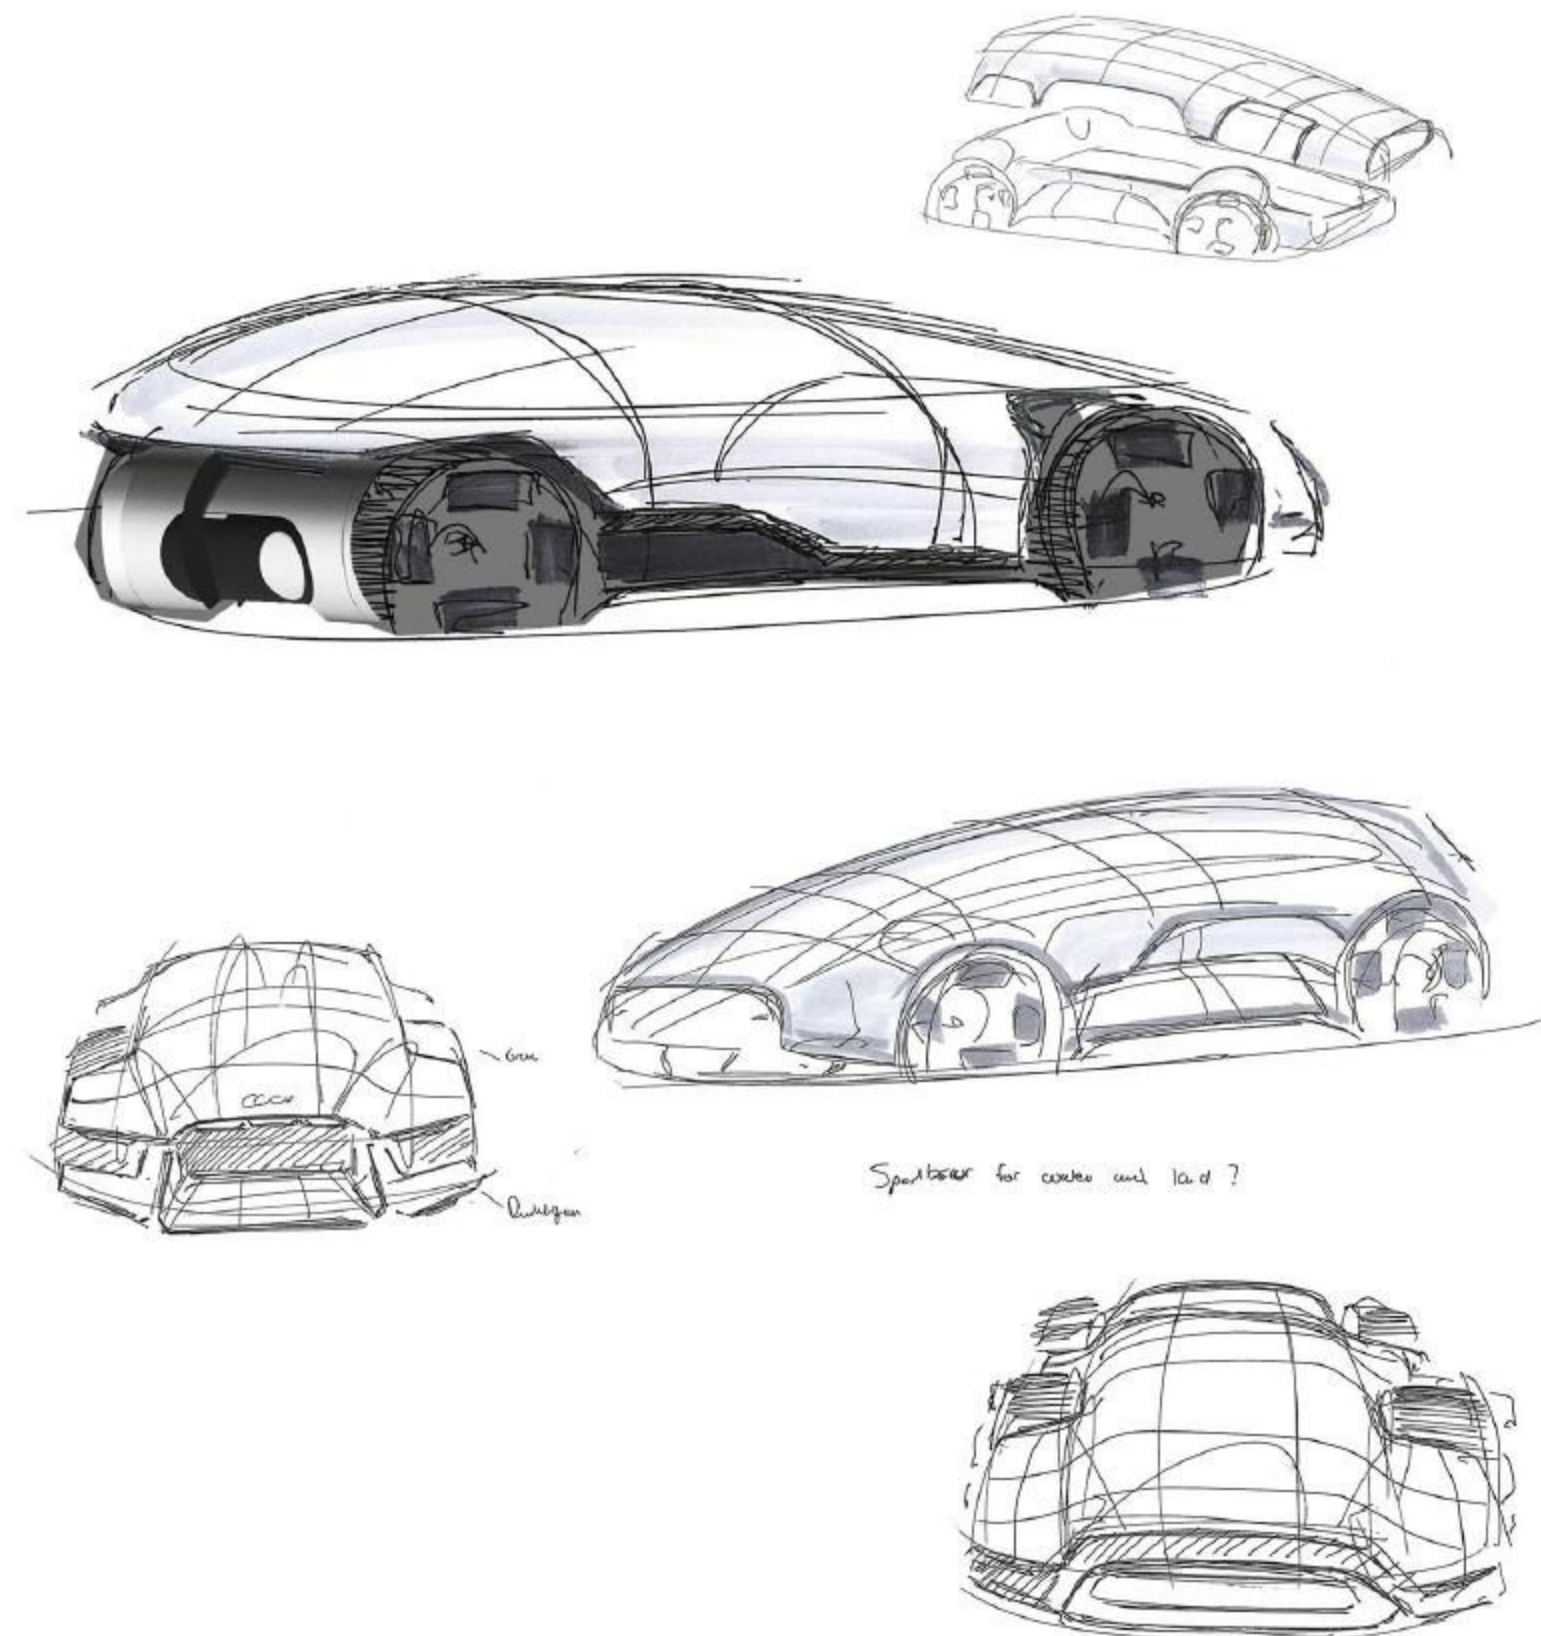

technical

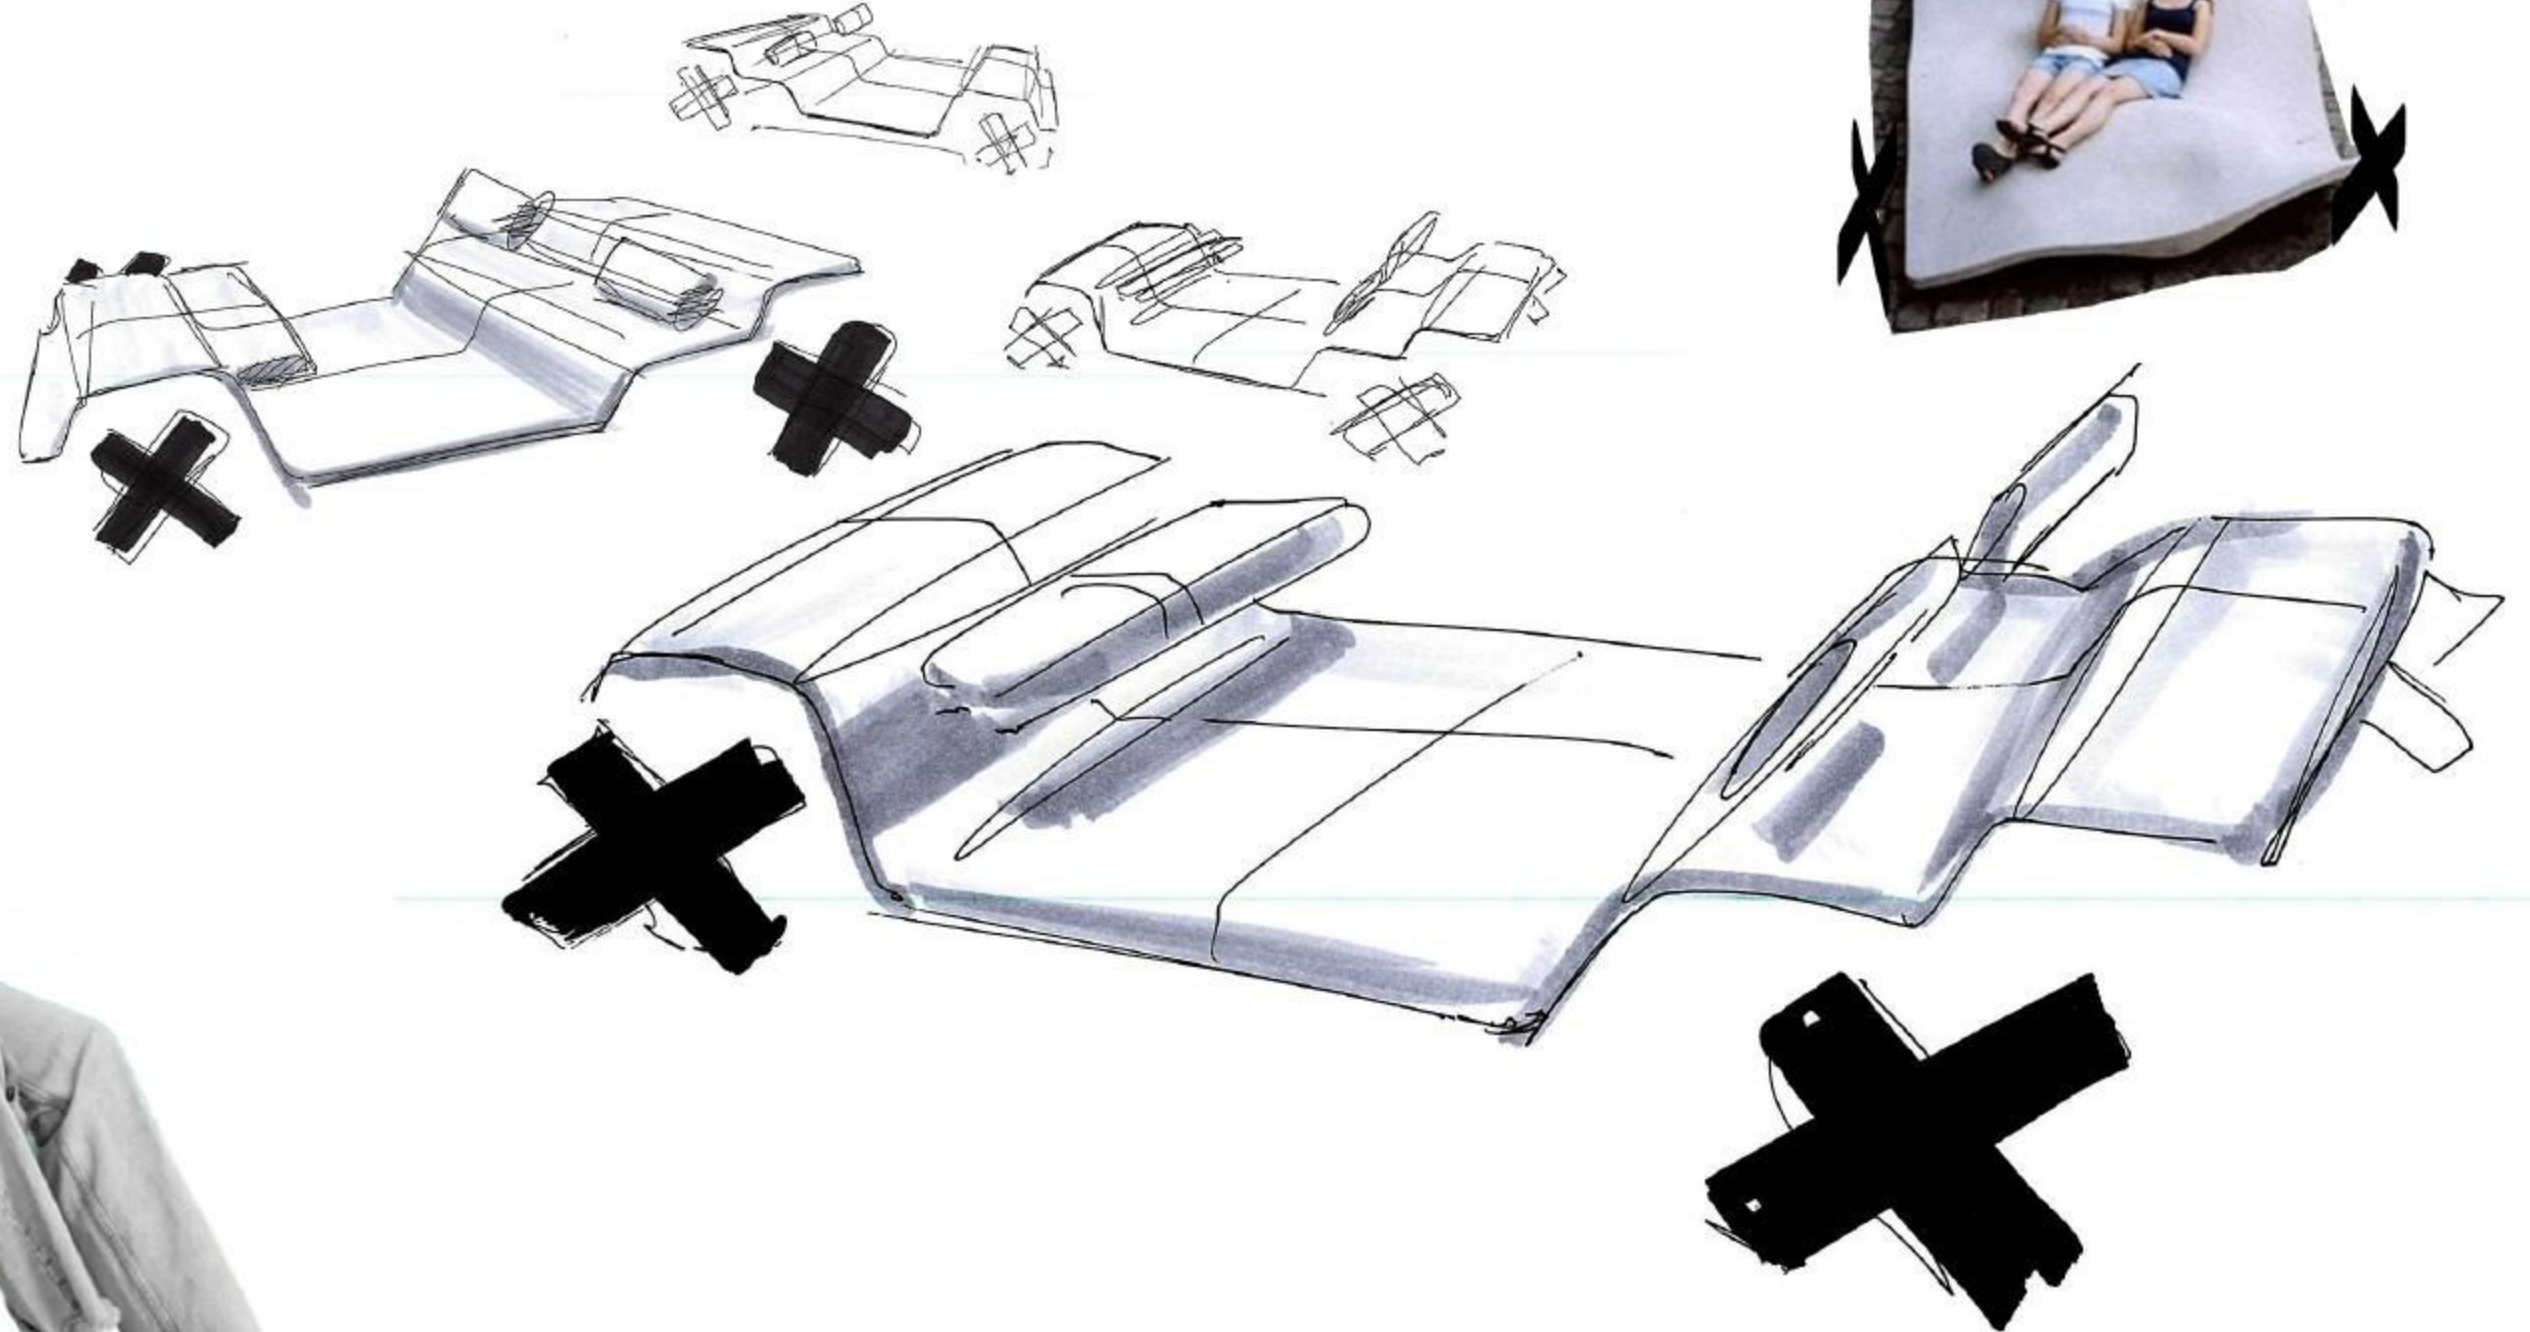

Exterieur development

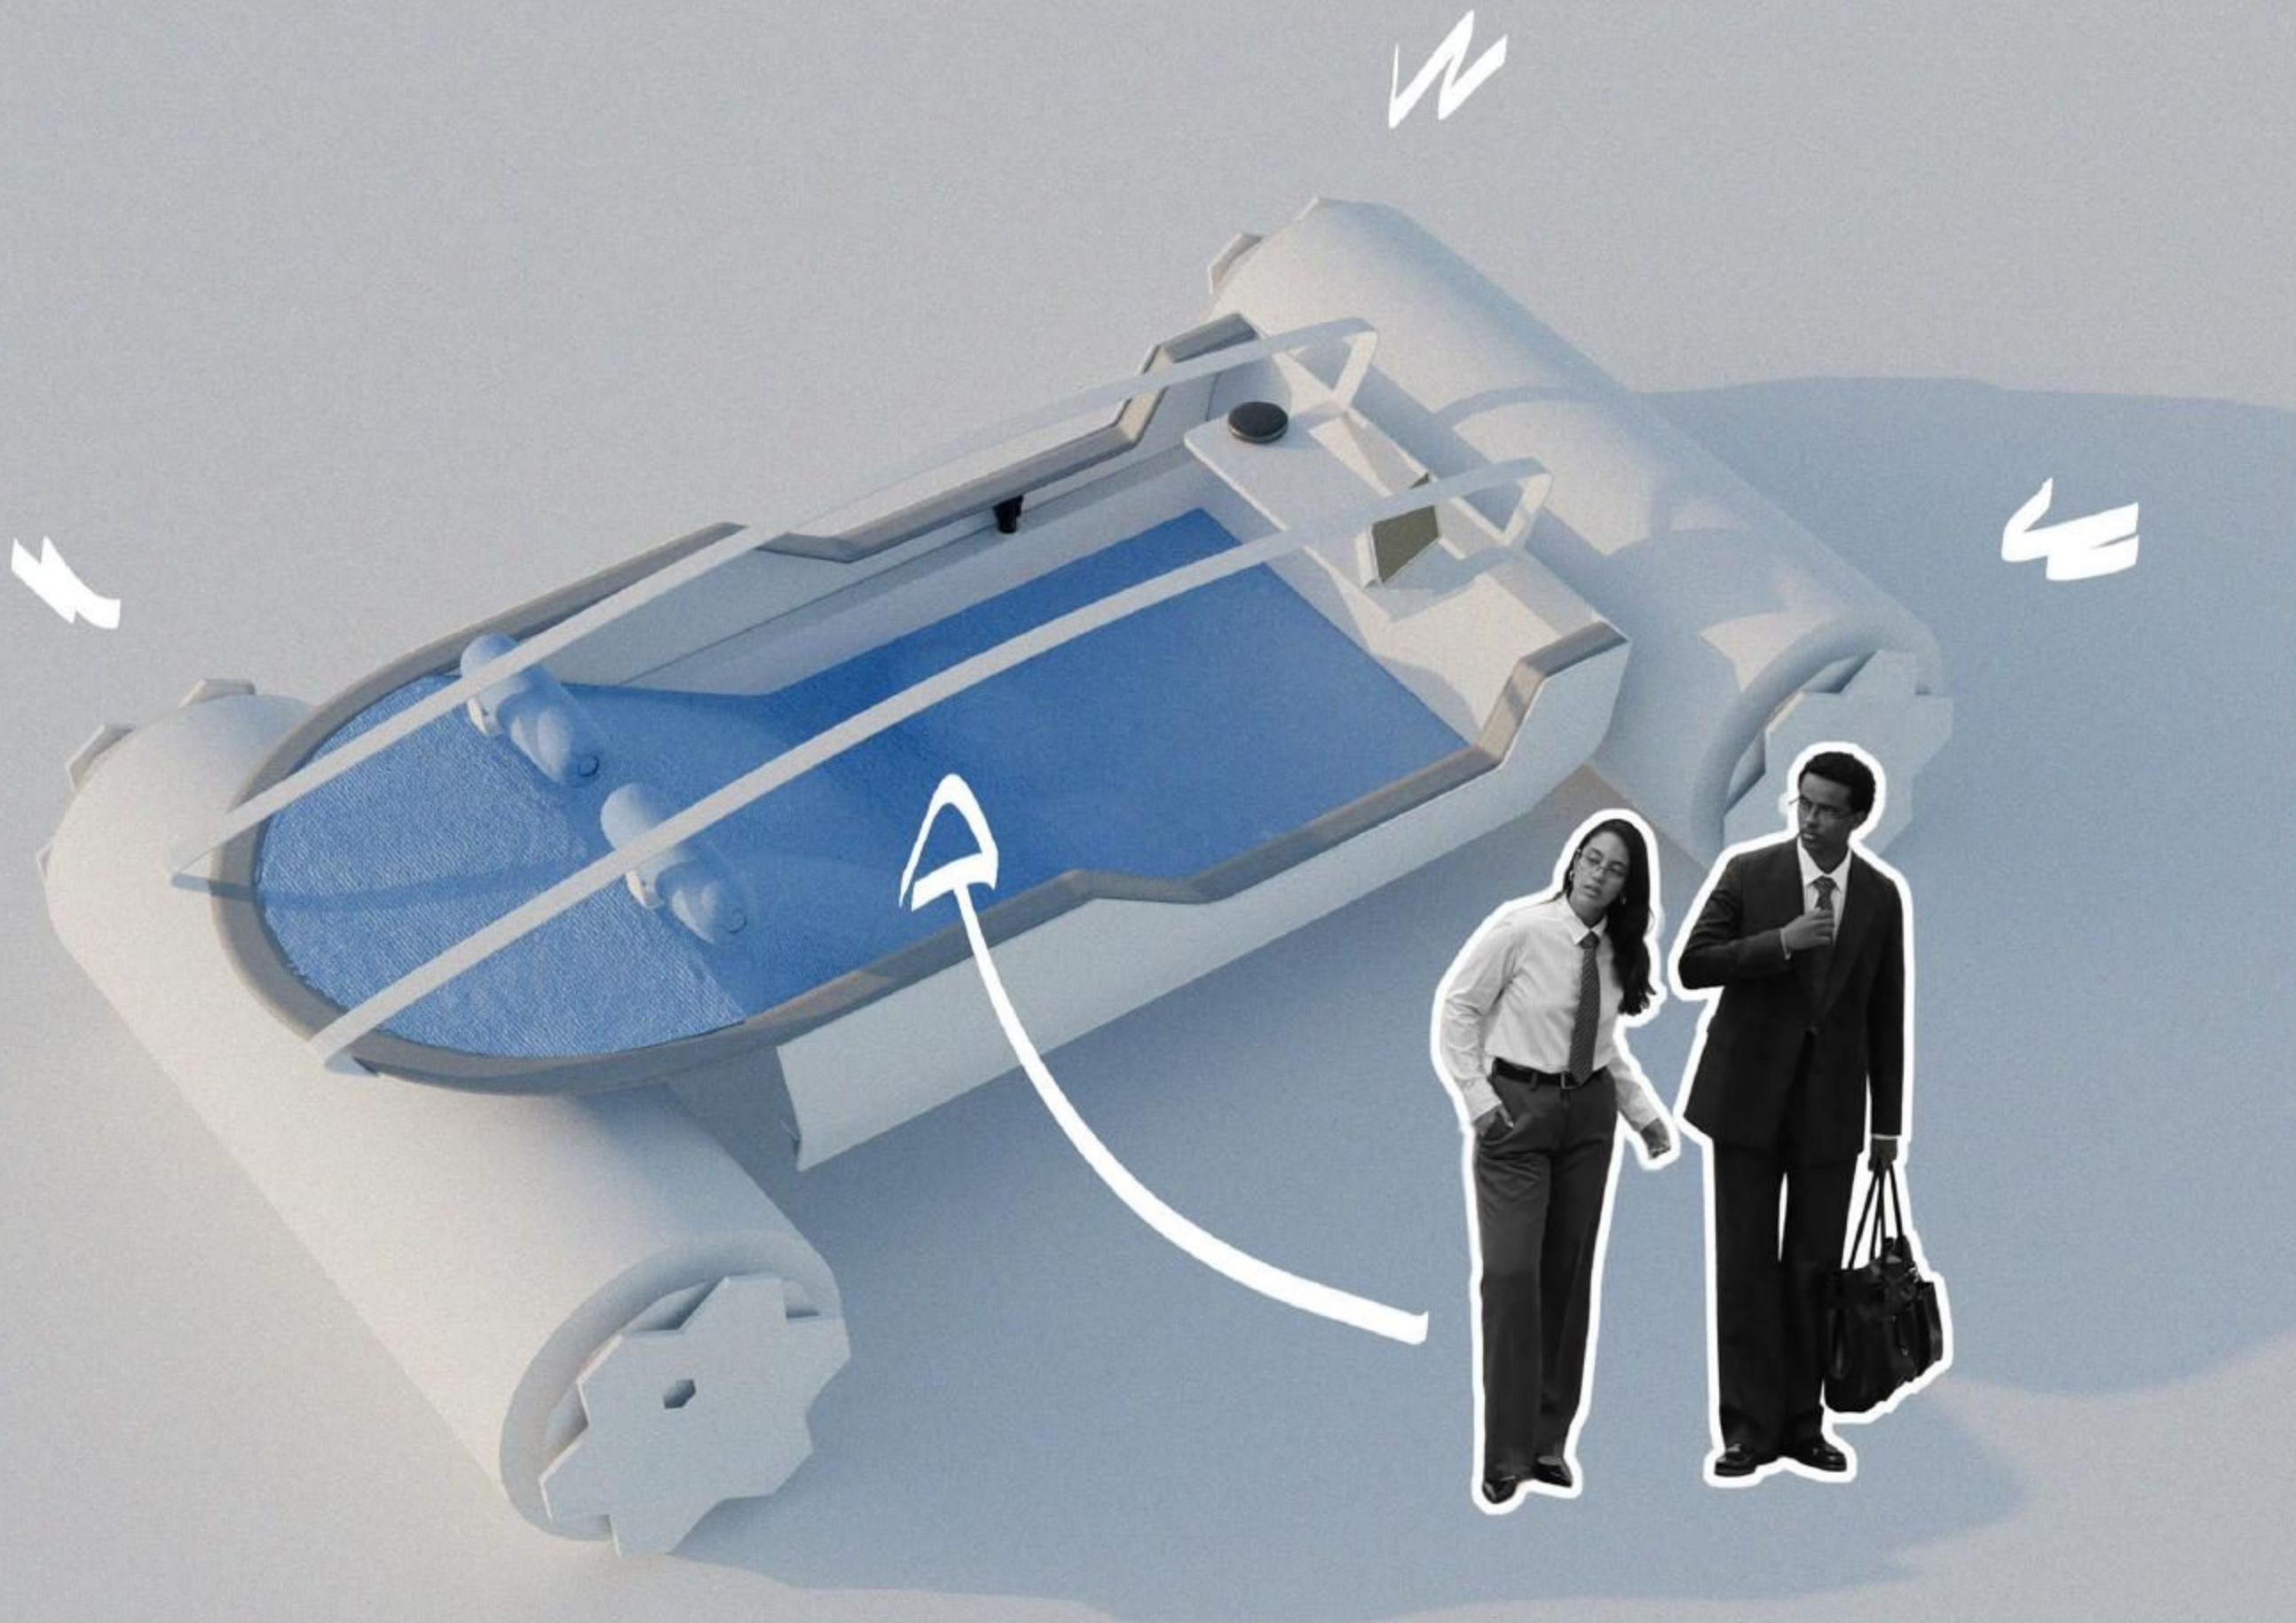

i wish i could ride my car on water

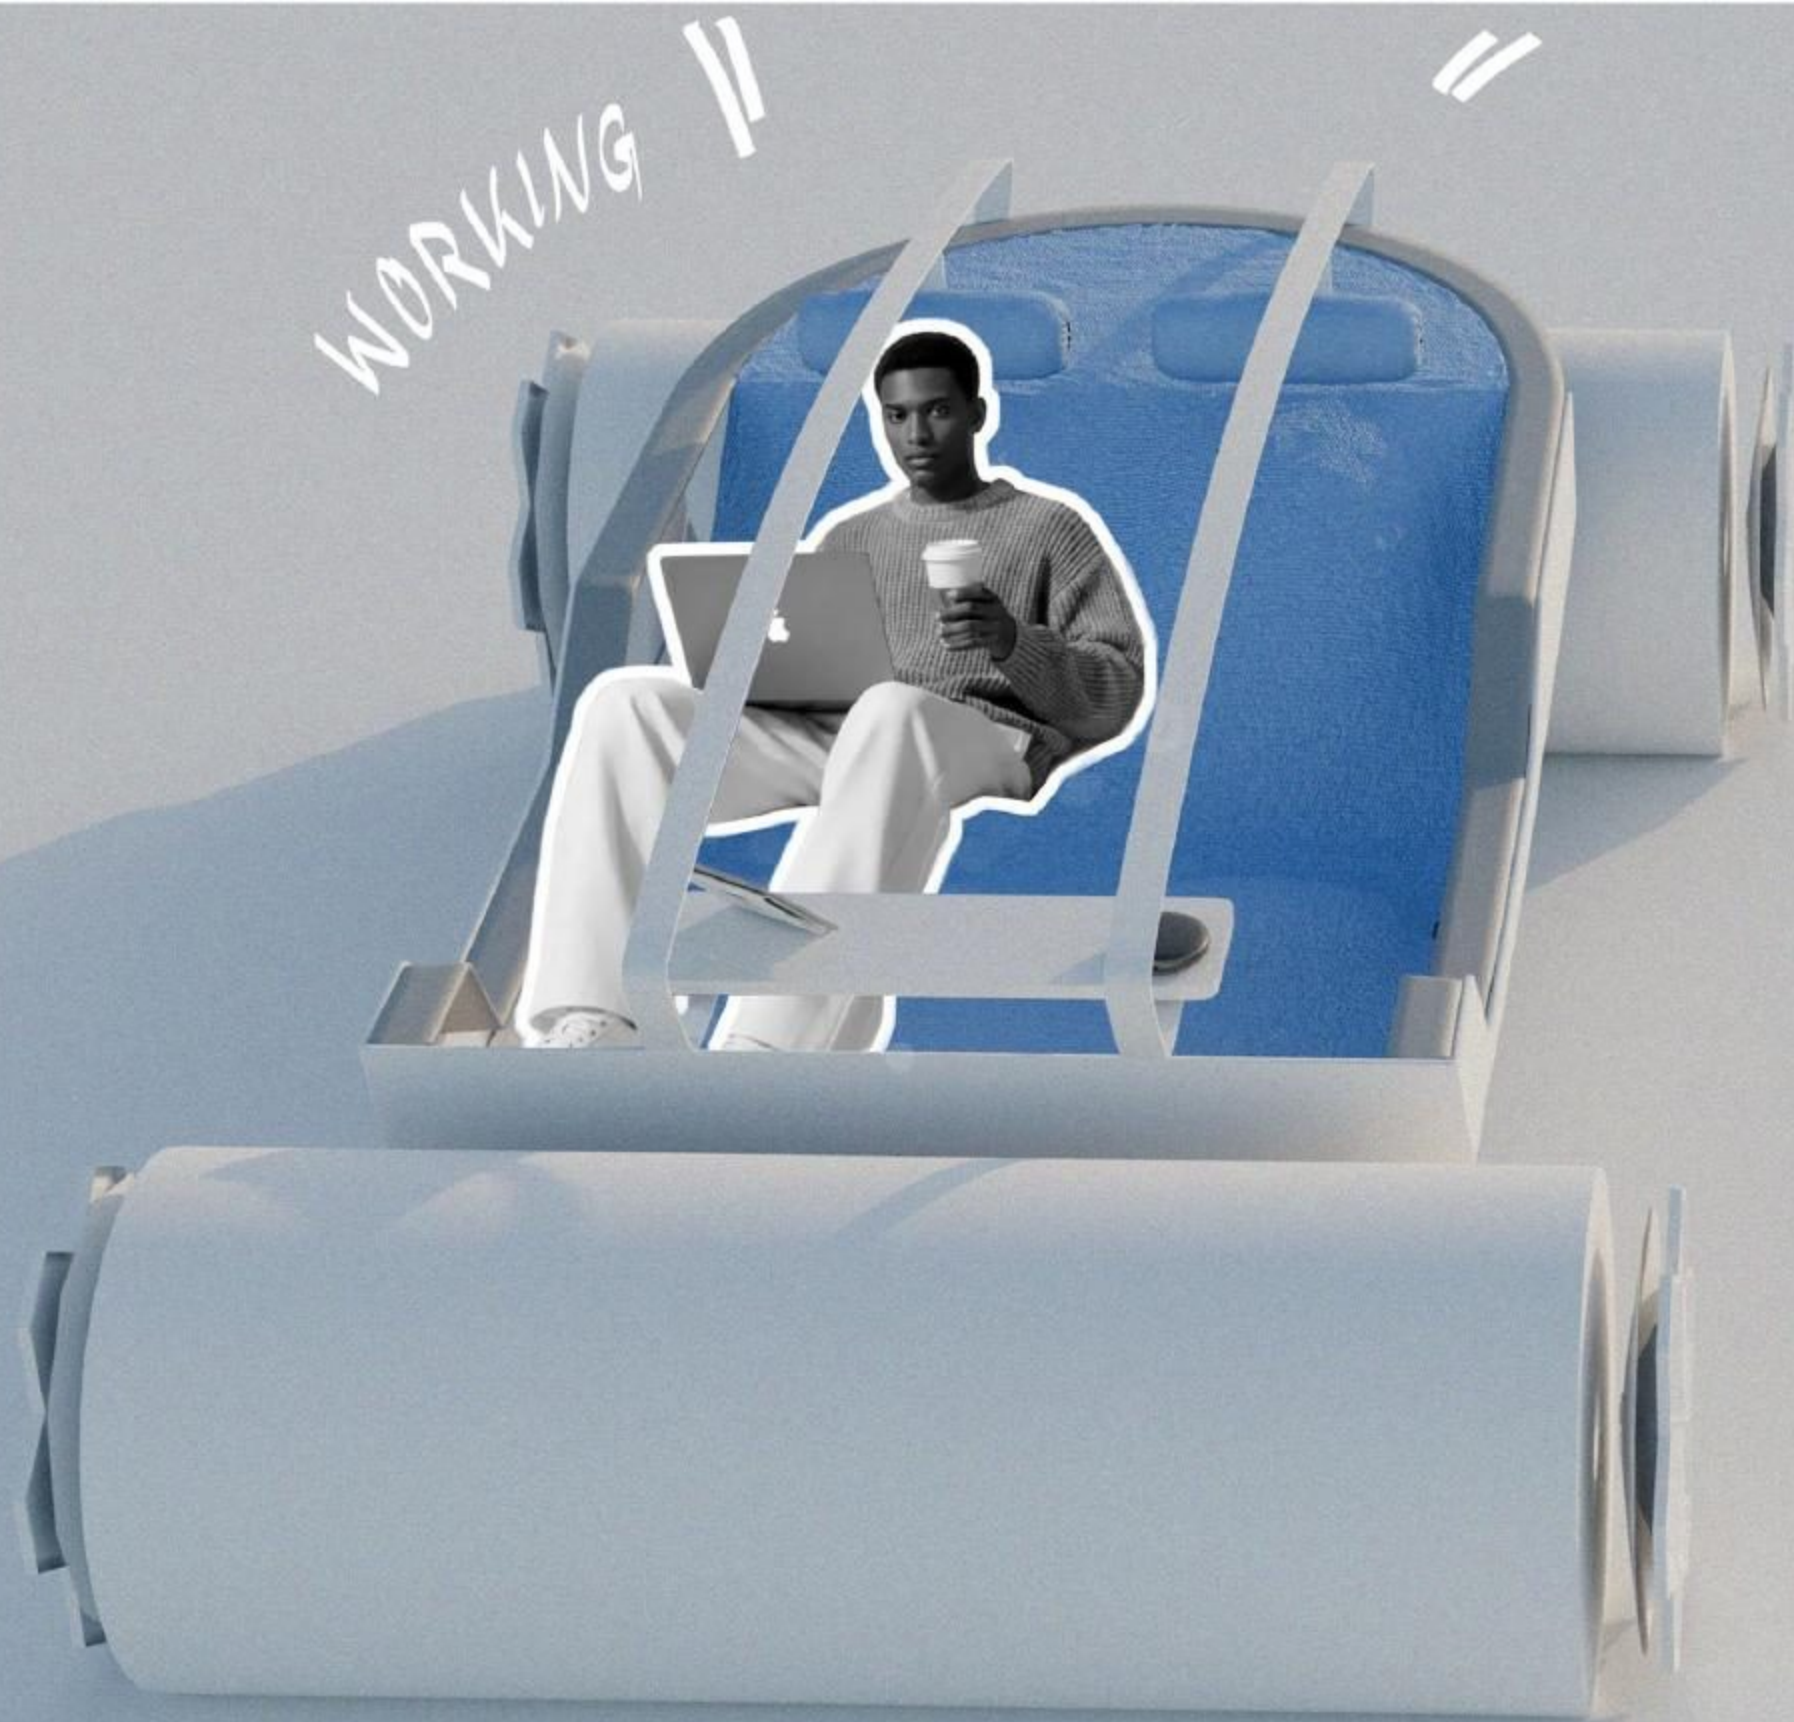

Interieur affordance research

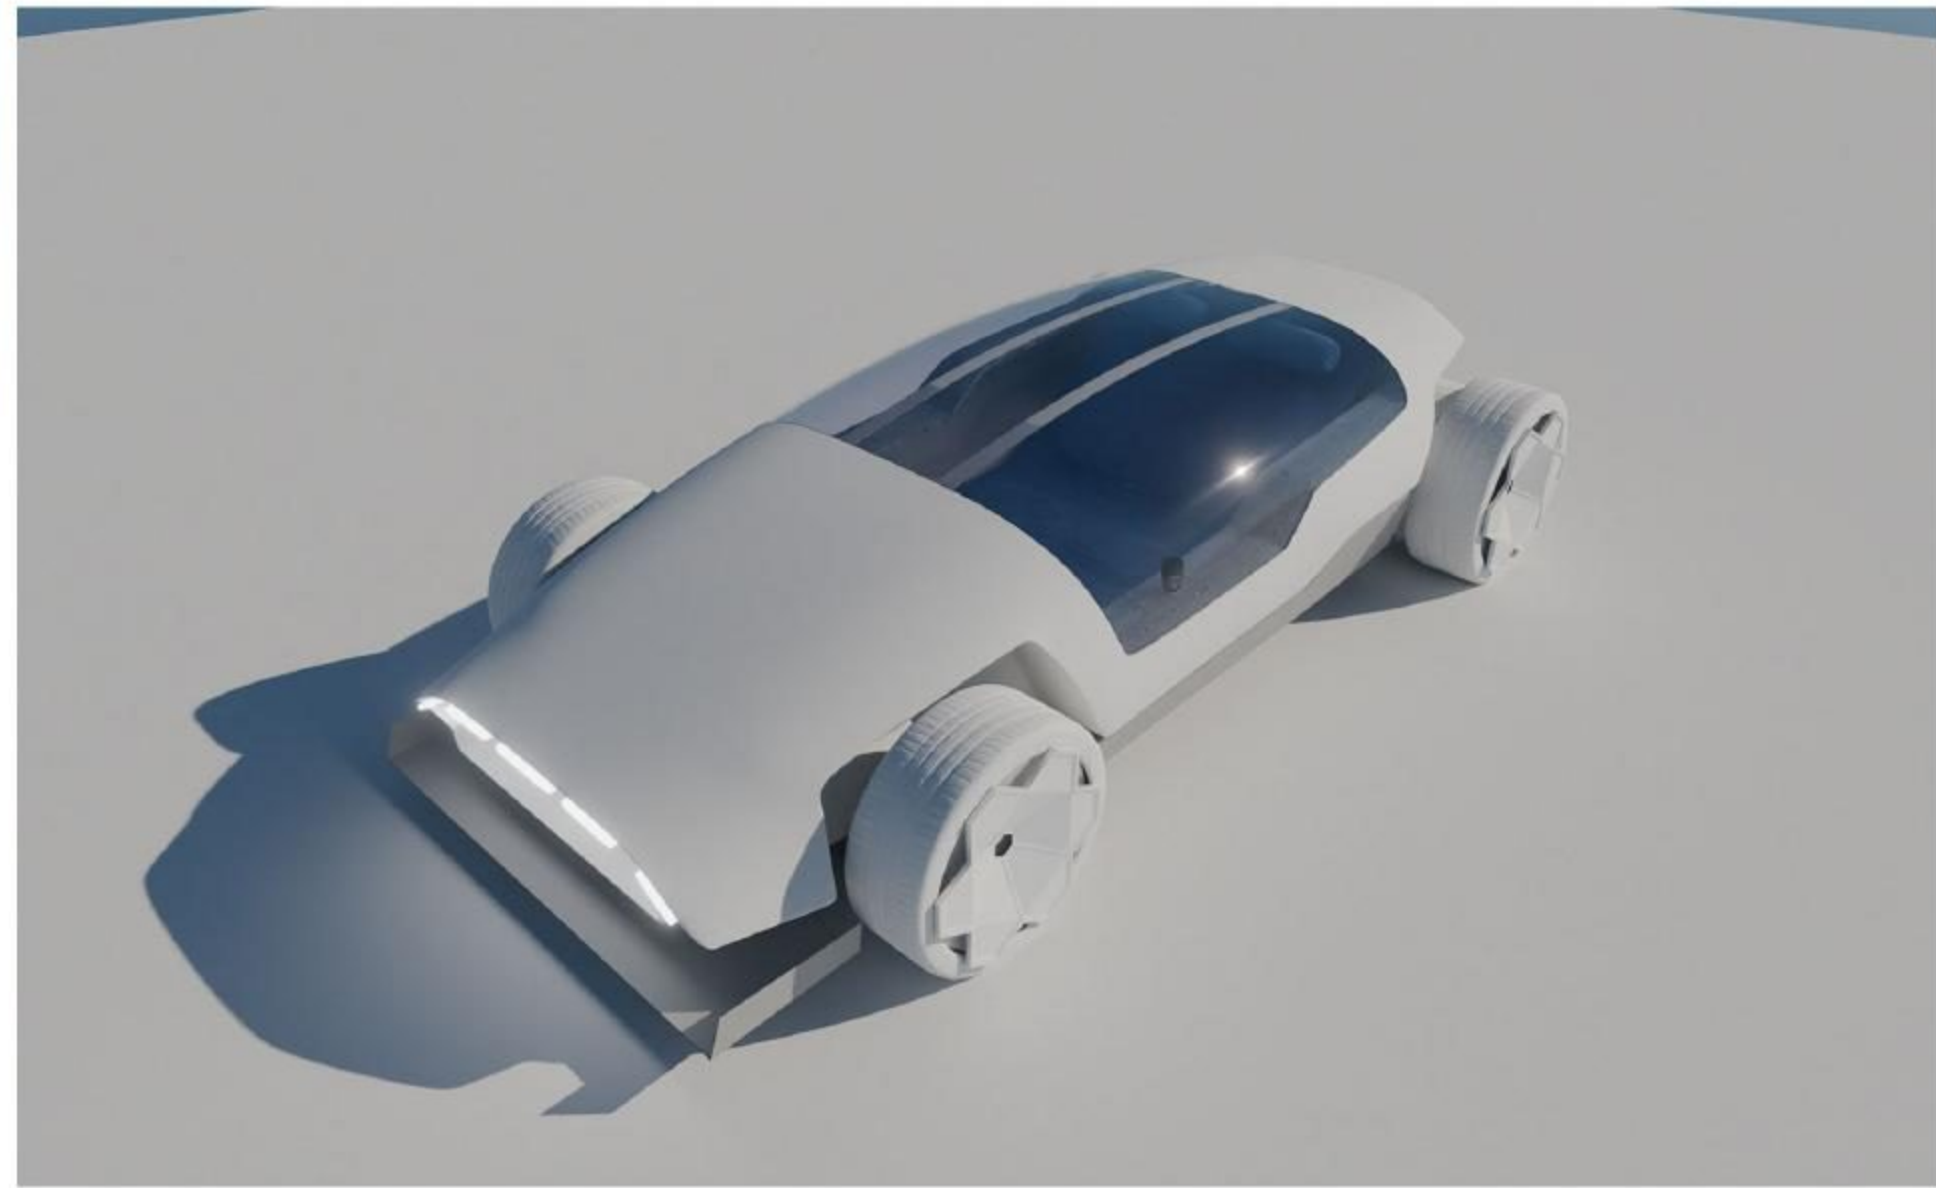

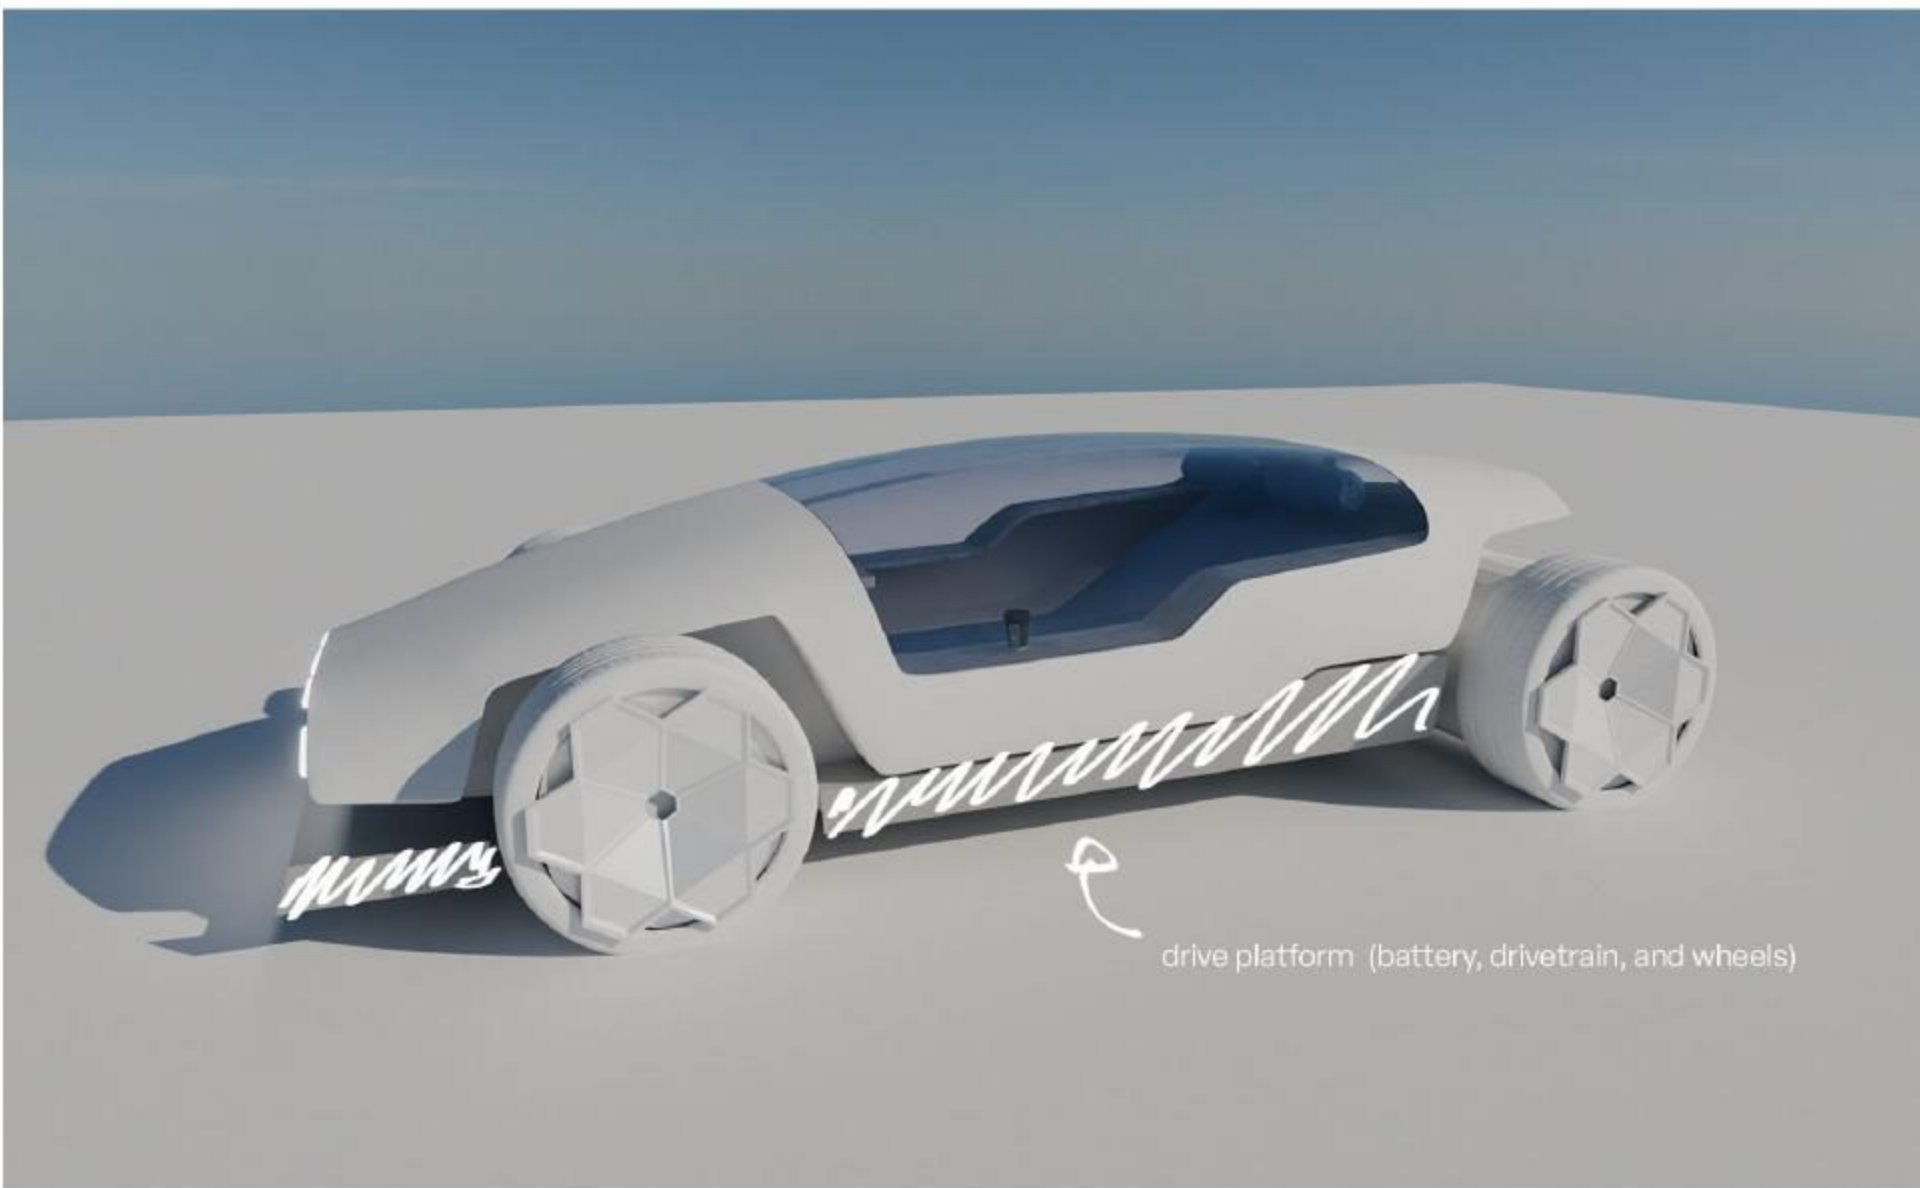

interieur as a place to slow down

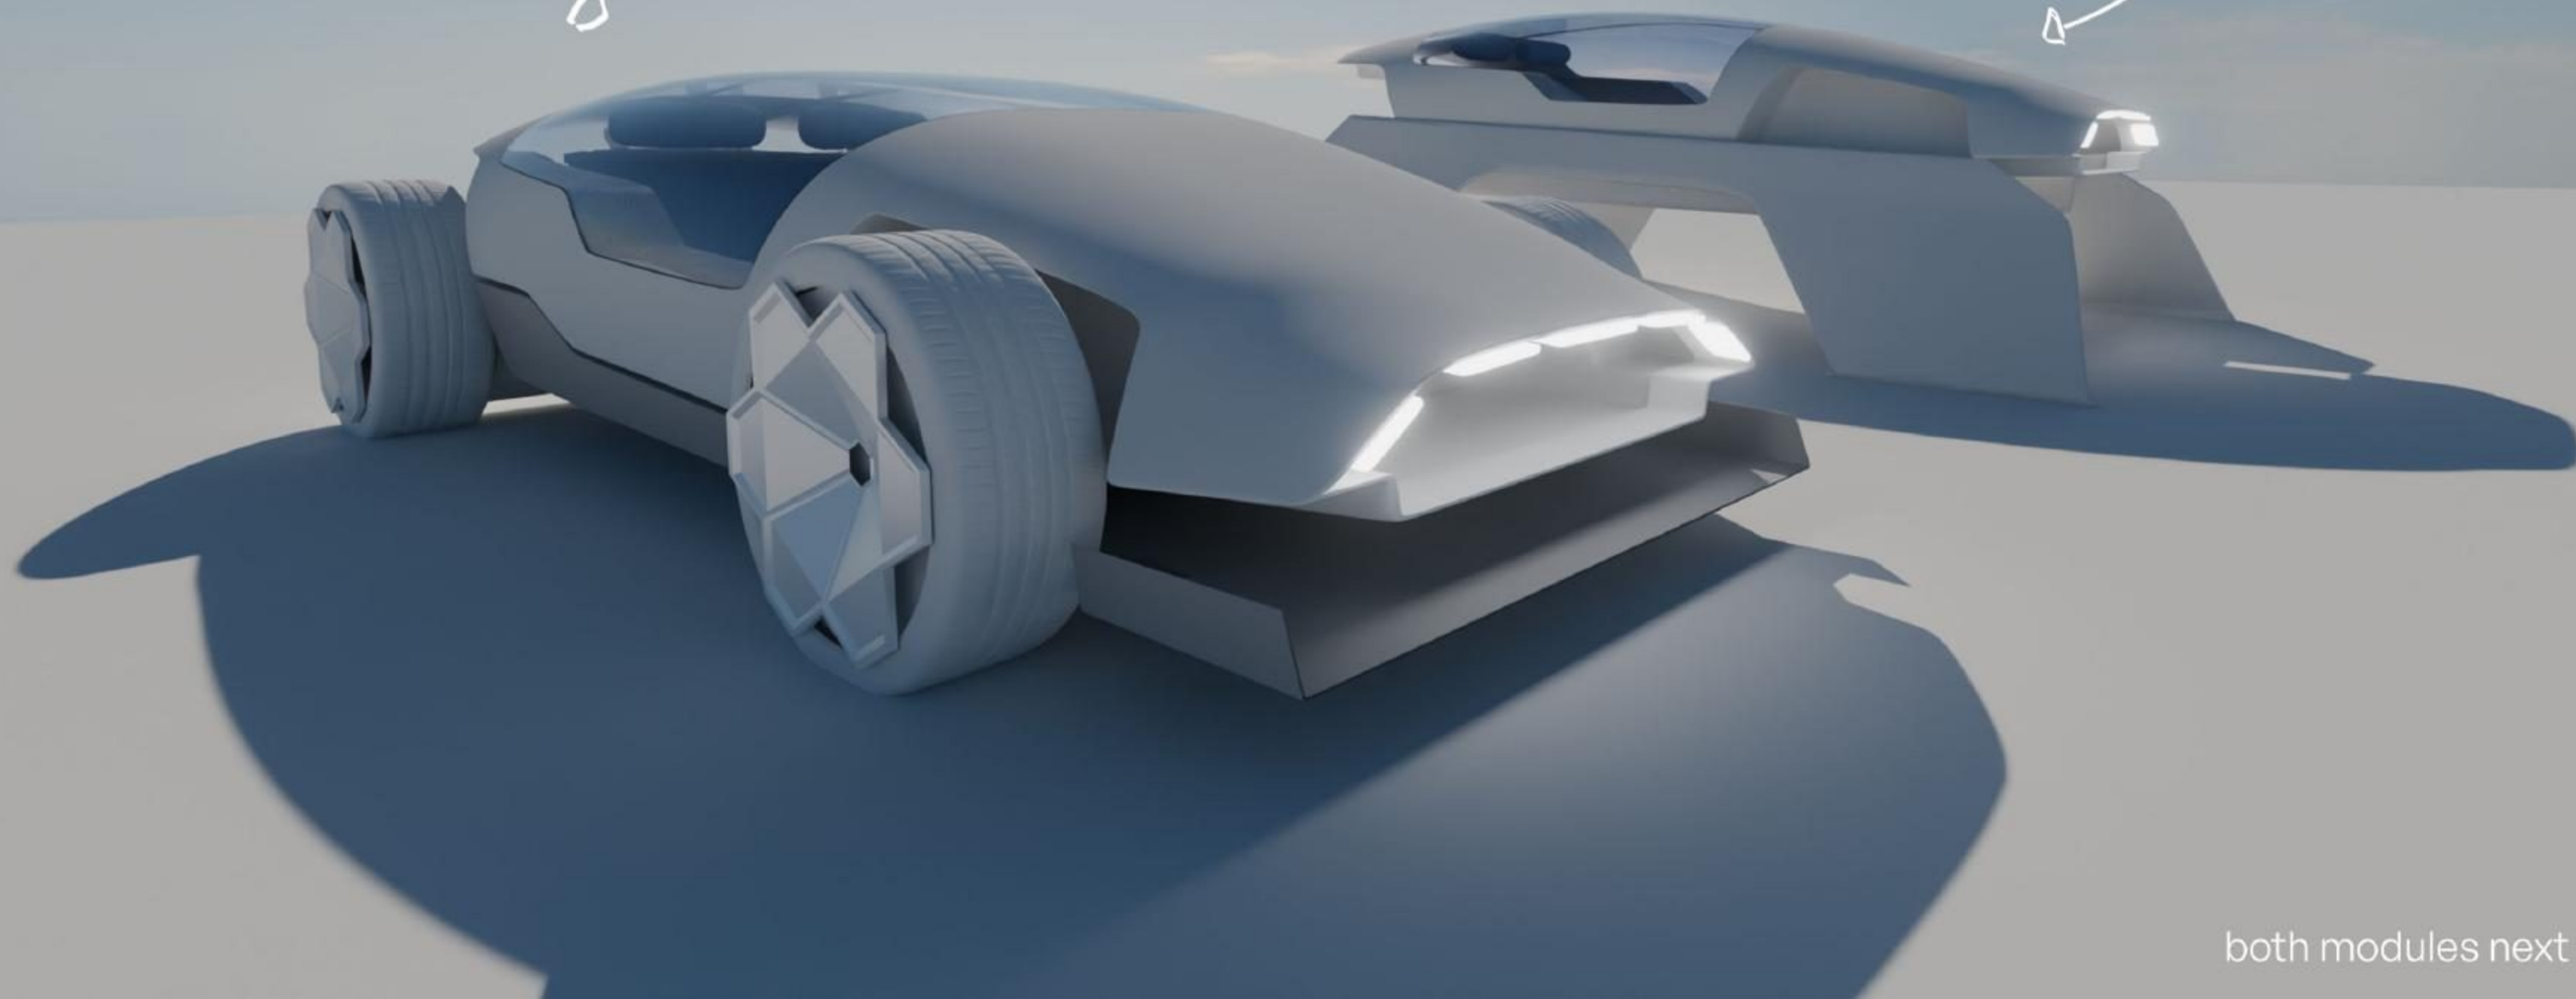

interieur as a calm workspace

final exterior direction - Blender model

land platform

water platform

both modules next to each other

story

start of the trip

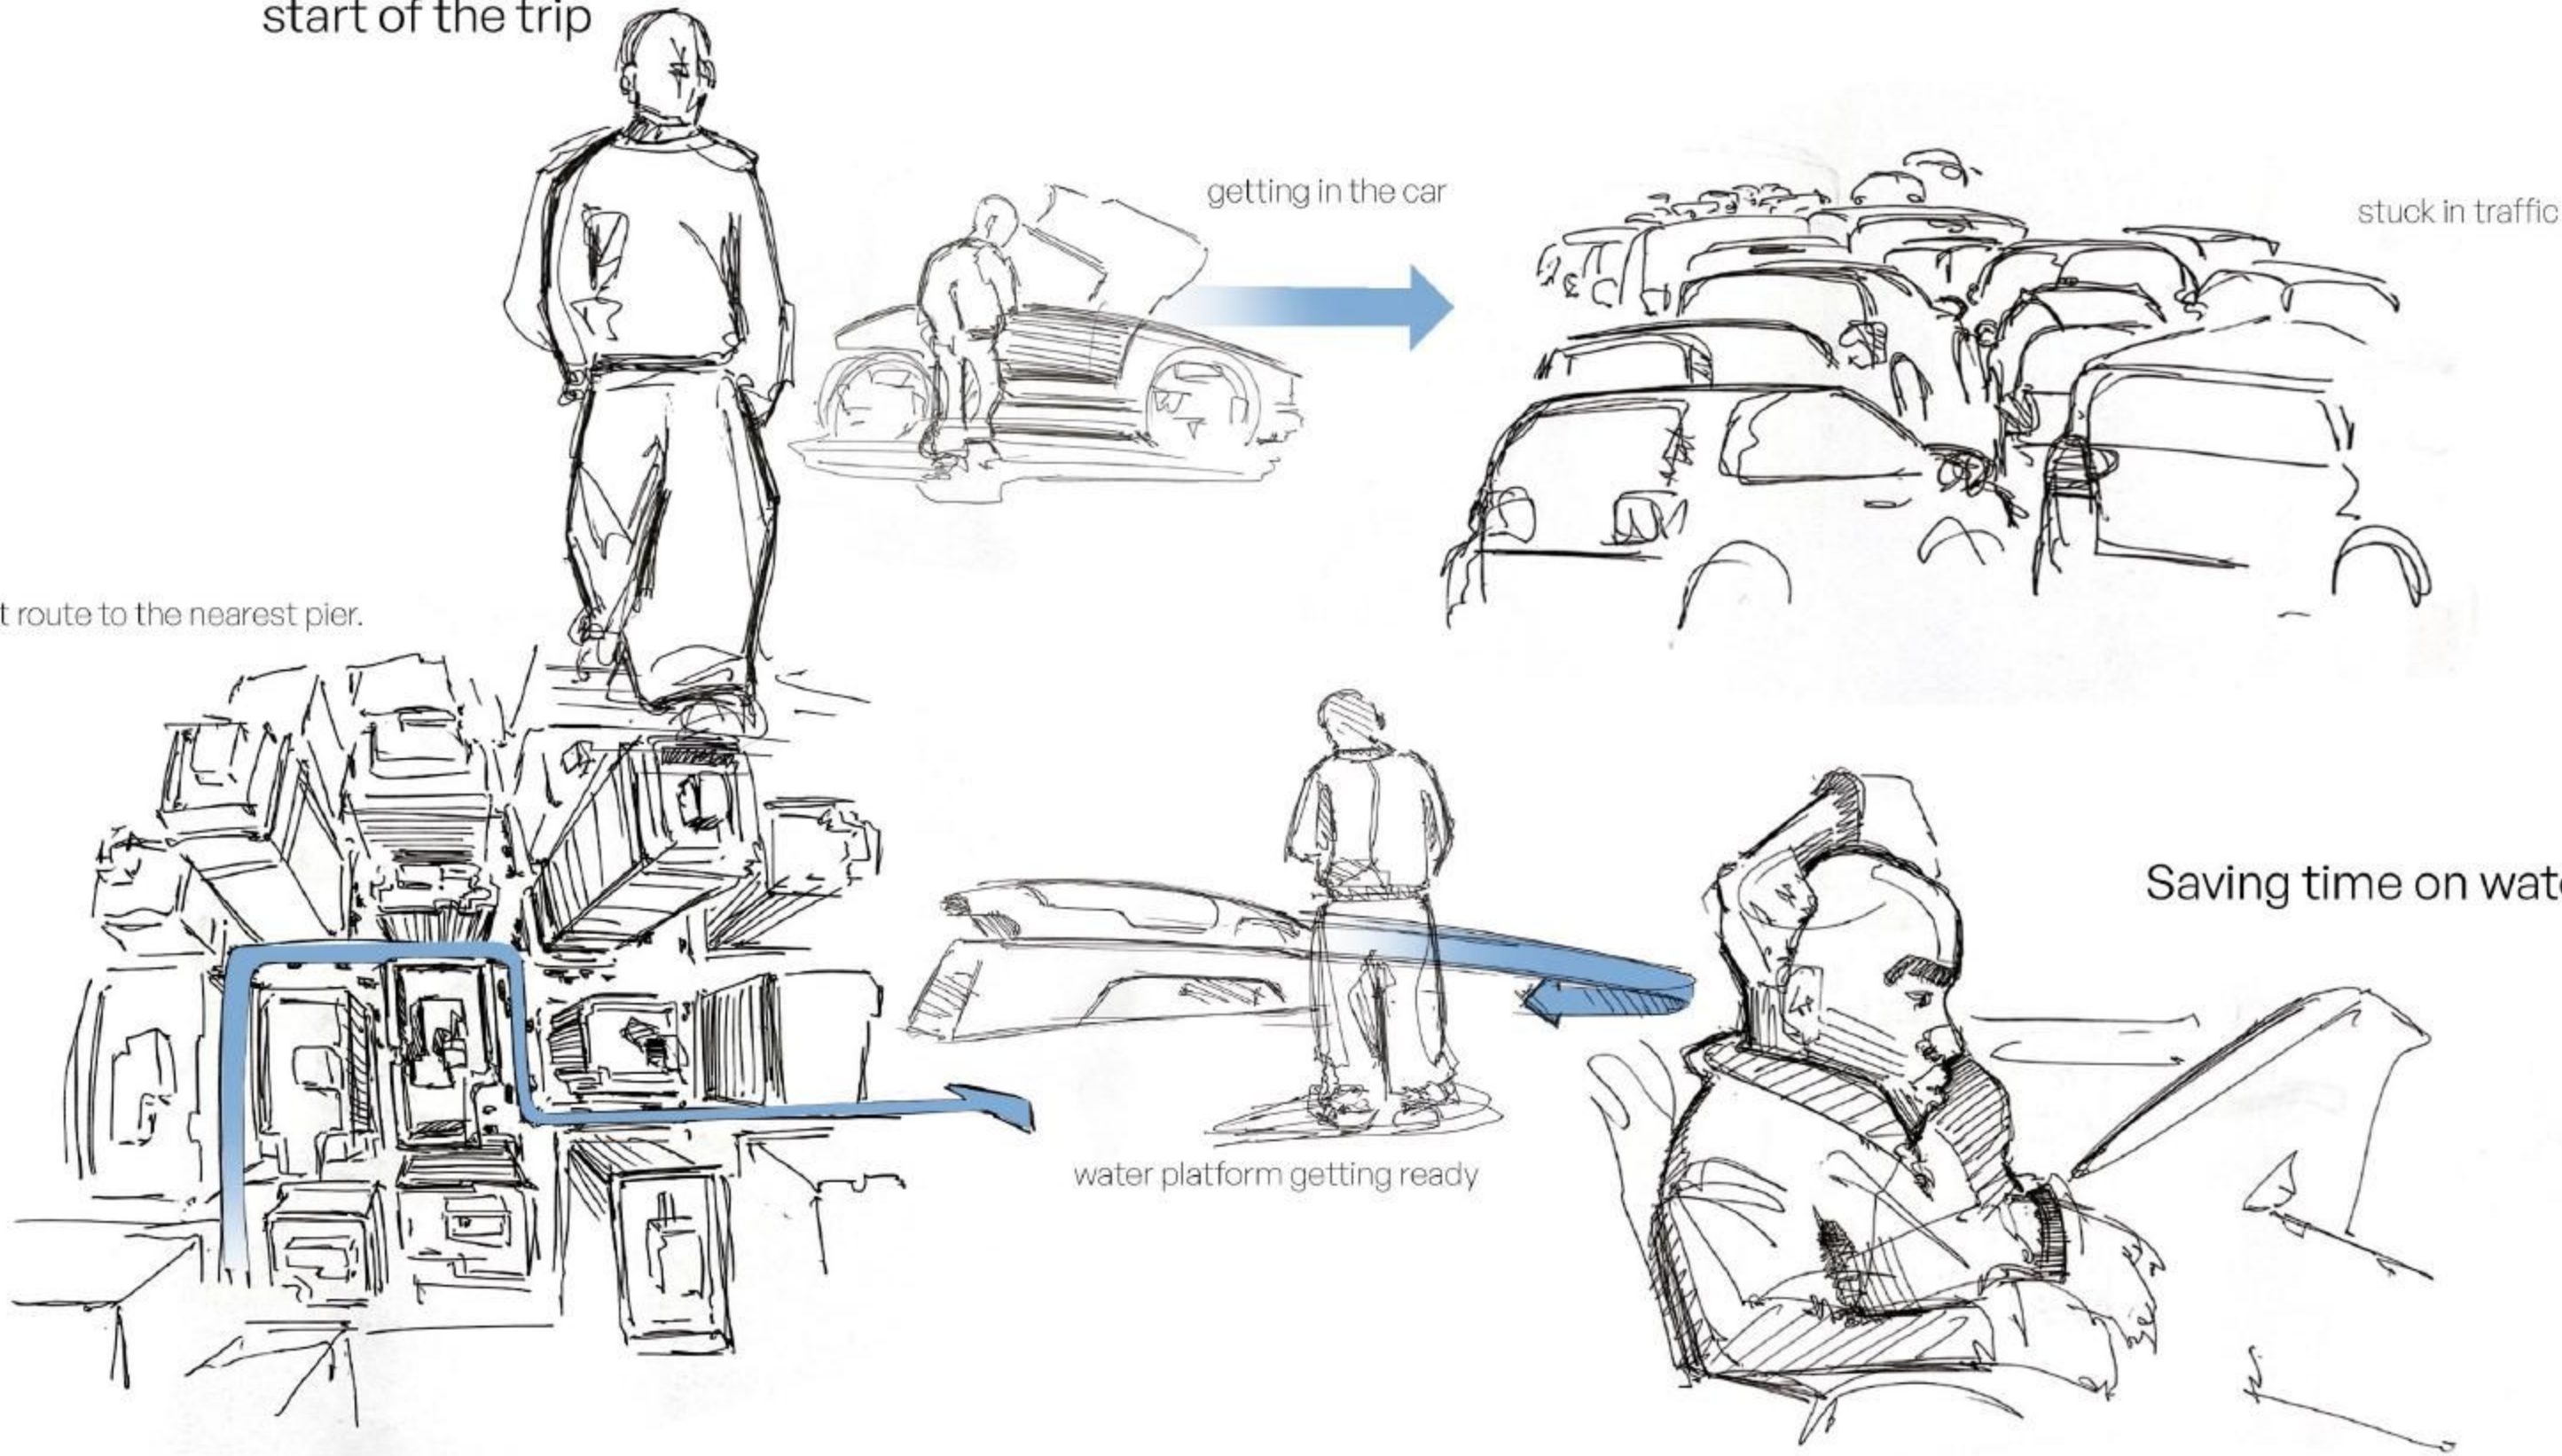

getting in the car

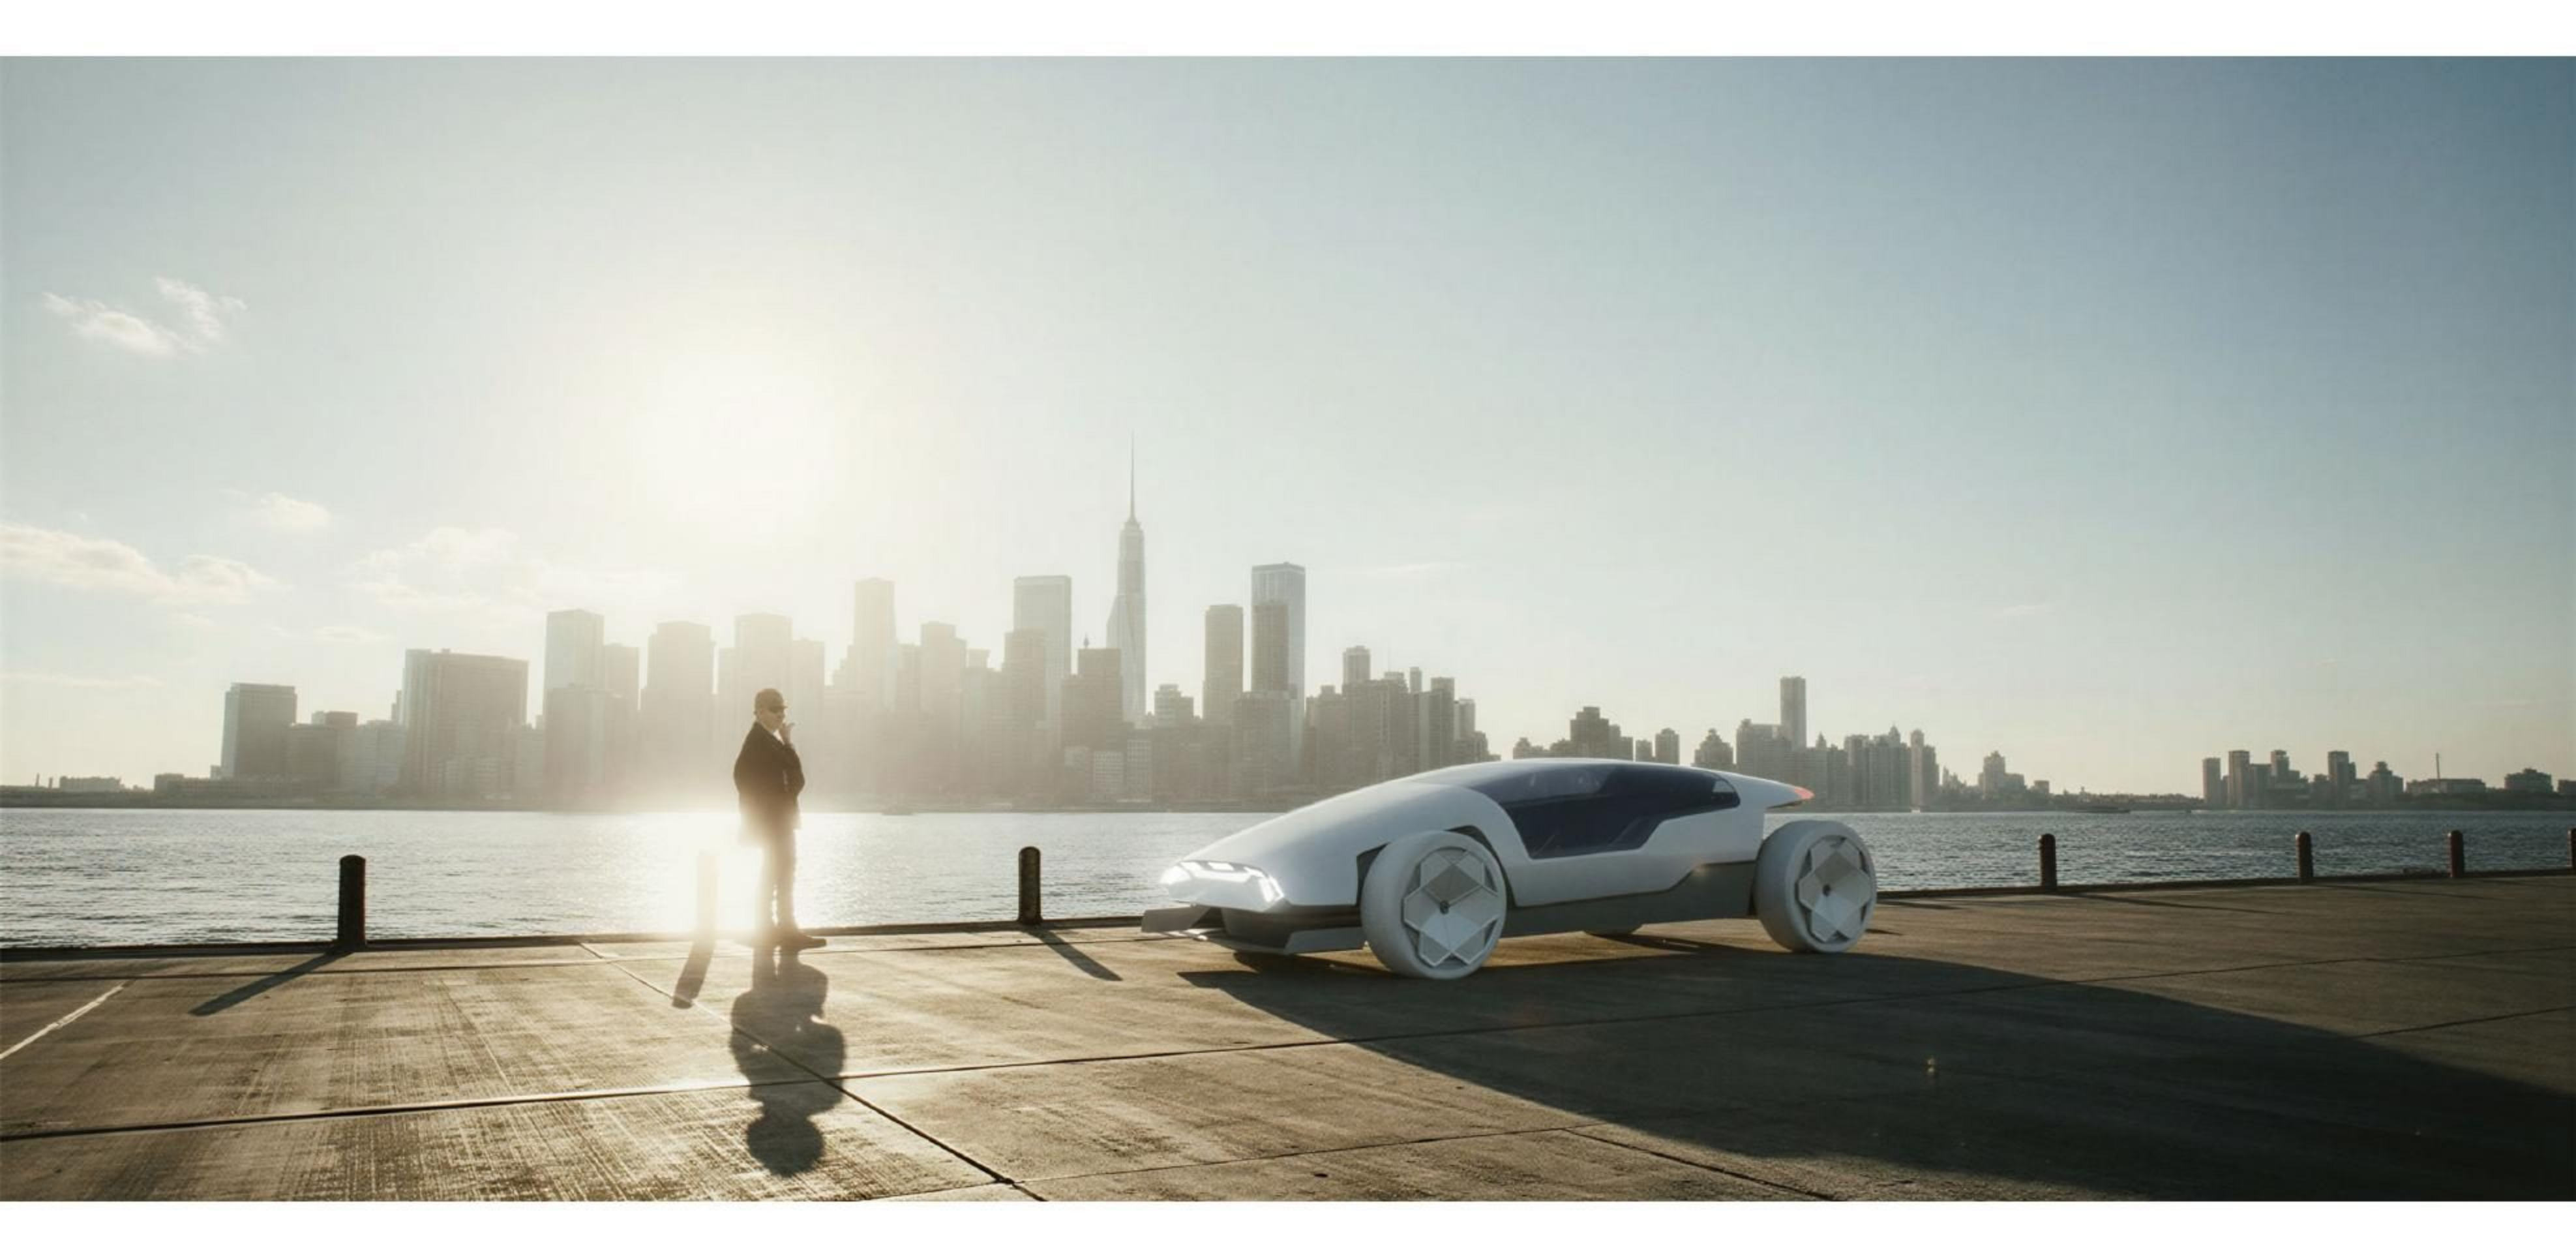

stuck in traffic

Avoid traffic,
take the direct route to the nearest pier.

Saving time on water

water platform getting ready

In the future, wealth will not be measured in money - but in the quality of time we own

DANKE.
